Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The ANNH Program provides grants to eligible

institutions of higher education (IHEs) to enable them to improve and expand their capacity to serve Alaska Natives and Native Hawaiians. Alaska Native-serving institutions and Native Hawaiian-serving institutions may use these grant awards to plan, develop, undertake, and carry out activities to improve and expand such institutions' capacity to serve Alaska Natives or Native Hawaiians.

Priorities: This notice contains one competitive preference priority. This priority is from the Notice of Administrative Priority and Definitions for Discretionary Grant Programs, which was published in the **Federal Register** on December 30, 2020 (85 FR 86545) (Remote Learning NFP).

Competitive Preference Priority: For FY 2021 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is a competitive preference priority. Under 34 CFR 75.105(c)(2)(i), we award up to three additional points for the priority, depending on how well the application meets this priority.

This priority is:

Building Capacity for Remote Learning (up to 3 points).

Under this priority, an applicant must propose a project that is designed to provide personalized and job-embedded professional learning to build the capacity of educators to create remote learning experiences that advance student engagement and learning through effective use of technology (e.g., synchronous and asynchronous professional learning, professional learning networks or communities, and coaching).

Definitions: The definitions are from 34 CFR 77.1 and the Remote Learning NFP.

Demonstrates a rationale means a key project component included in the project's logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes.

Logic model (also referred to as theory of action) means a framework that identifies key project components of the proposed project (i.e., the active "ingredients" that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

Note: In developing logic models, applicants may want to use resources such as the Regional Educational Laboratory Program's (REL Pacific) Education Logic Model Application, available at <https://ies.ed.gov/ncee/edlabs/regions/pacific/>
