Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: EPA first developed energy efficiency guidelines for new homes in 1995. ENERGY STAR's new construction programs promote cost-effective, whole house energy efficiency that is independently verified by third party professionals. Through 2022, there have been more than 2.3 million ENERGY STAR certified new homes built in the U.S.

Since participation in the ENERGY STAR program is voluntary, organizations are not required to submit information to EPA. Information received is not of a confidential nature. EPA has developed this ICR to obtain authorization to collect information for the following activities:

Joining the ENERGY STAR Program and Related Activities: An organization interested in joining ENERGY STAR as a partner is asked to submit a partnership agreement establishing its commitment to ENERGY STAR. Partners agree to undertake efforts such as educating their staff and the public about their partnership with ENERGY

STAR, developing and implementing a plan to improve energy performance in homes, and highlighting achievements utilizing the ENERGY STAR label.

Verification of ENERGY STAR Guidelines: The purpose of the verification process is to objectively and independently ensure the quality of home construction and improvements with respect to ENERGY STAR guidelines. Under ENERGY STAR's Certified Homes program, verification of a home's energy efficiency occurs when site-built home builders, multifamily high-rise developers, or plants producing manufactured and modular homes want to apply the ENERGY STAR label on homes. The verification process for site-built homes involves the home builder, the third-party verification organization (Home Energy Rating Providers and Home Energy Raters), and the Heating, Ventilation, and Cooling (HVAC) contractor. These organizations complete four checklists as part of the verification process. The verification process for multifamily high-rise units involves the developer and a Licensed Professional (architect or engineer), who submit information both pre-construction and post-construction to ensure that program prerequisites and energy conservation measures are properly installed and meet ENERGY STAR requirements. In addition, plants producing manufactured and modular homes must undergo a certification process to ensure that they consistently produce and install homes that meet ENERGY STAR guidelines. Also, under ENERGY STAR's HVAC Verified Installation program, local program sponsors promote the installation of HVAC systems in homes to meet ENERGY STAR guidelines. Sponsors oversee contractors who perform the installations, perform tests, and report the results to the sponsors. Sponsors submit periodic reports to EPA on these activities.

Evaluation: Partners and other program participants are asked to periodically submit information to EPA as needed to assist in evaluating ENERGY STAR's effectiveness in helping organizations promote energy efficiency in homes, to assess partners' level of interest and ability in promoting ENERGY STAR in the residential sector, and to determine the impact that ENERGY STAR has on residential energy use and the supply and demand for energy-efficient homes and home improvement products and services.

Periodic Reporting: Some partners are asked to submit information to EPA periodically to assist EPA in tracking and measuring progress in building and promoting ENERGY STAR certified

homes and installing and promoting energy-efficient improvements.

ENERGY STAR Awards: Each year, partners are eligible for an ENERGY STAR award, which recognizes organizations demonstrating outstanding support in promoting ENERGY STAR. An application is submitted to EPA by interested partners.
