#### SUPPLEMENTARY INFORMATION:

#### I. Abstract

This submission is a renewal of an existing information collection.

Marine recreational anglers are surveyed for catch and effort data, fish biology data, and angler socioeconomic characteristics. These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (MSA, 16 U.S.C. 1801 *et seq.*), as amended, regarding conservation and management of fishery resources.

Marine recreational fishing catch and effort data are currently collected through a combination of telephone surveys and on-site intercept surveys with recreational anglers and for-hire vessel operators. Recent amendments to the MSA require the development of an improved data collection program for recreational fisheries. To address these requirements, NOAA Fisheries has implemented the Marine Recreational Information Program (MRIP) to replace the Marine Recreational Fisheries Statistics Survey. MRIP is testing alternative approaches for surveying recreational anglers in an effort to improve the quality, resolution and timeliness of recreational fishing statistics.

#### II. Method of Collection

Information will be collected through telephone, mail, online (Web), and face-to-face interviews.
