First, the Commission sought comment on a contribution methodology that would impose a minimum contribution obligation on all interstate telecommunications carriers, and a flat charge for each end-user connection, depending on the nature or capacity of the connection. Next, the Commission sought comment on a proposal to assess all connections based purely on capacity. Finally, the Commission sought comment on a proposal to assess providers of switched connections based on their working telephone numbers. If adopted, the proposals may entail altering the current reporting requirements to which interstate telecommunications carriers are subject under Part 54 of the Commission's rules.
