

of the leverage ratio is that it does not account for the wide spectrum of credit risk and creates an incentive for the institution to avoid investing in low-risk assets.

A Modified Leverage Ratio

To address some of the concerns with the leverage ratio discussed above, it might be appropriate to consider modifying the measure to account for off-balance sheet exposures. A modified leverage ratio could incorporate the simplicity of the leverage ratio while seeking to remedy its main weaknesses. A modified leverage ratio would be a relatively simple measure—a major objective of the non-complex framework. A disadvantage of the modified leverage ratio is that, unlike the risk-based approach, it would provide no capital benefit to banking organizations that maintain a low-risk profile and might encourage institutions to invest in higher-risk assets.

The appropriate capital framework for a non-complex institution depends partly on the screening criteria chosen to assess complexity or risk. If complex or high-risk banking organizations can be effectively screened out of the non-complex category, then the benefits of a leverage-based approach will likely be enhanced. Similarly, if banking organizations with significant off-balance sheet items are screened out of the non-complex framework, then use of a modified leverage ratio (that incorporates off-balance sheet items) might be unnecessary to assure sufficient levels of regulatory capital.

Question 12: What elements of the current risk-based framework should be retained within a simplified risk-based framework? What elements should not be included?

Question 13: Should classes of assets be re-assigned to other and potentially new risk weights, based on relative comparisons of historical charge-off data or other empirical sources, including but not limited to credit ratings?

Question 14: Is a leverage ratio a sufficient method for determining capital adequacy of non-complex institutions in a range of economic conditions?

Question 15: If off-balance sheet items are incorporated into a modified leverage ratio, what items should be incorporated, and how?

Question 16: What degree of burden reduction is foreseeable regarding any of the alternatives? Do the foreseeable benefits of burden reduction outweigh any concerns about establishing a non-complex domestic framework?

E. Implementation Issues

The establishment of a simplified capital framework presents a host of implementation issues. How would banking organizations be placed within the simplified framework? Once subjected to the simplified framework, how would the institution transition to a more complex framework, if needed? Would there be a transition or adjustment period? These implementation issues can be foreseen, but not fully addressed, until a framework is determined.

Moreover, the Agencies must determine the least burdensome and most efficient manner to collect data necessary to identify the universe of non-complex institutions and to provide this information to banking organizations in a timely manner. Options include requiring the Agencies to determine which banking organizations are subject to the non-complex framework using current regulatory reports, or requiring a banking organization to seek entry into the non-complex framework by filing an application.

On an ongoing basis, a change in size, structure, complexity, or risk profile of a non-complex institution could impact its continued eligibility for the simplified framework. Institutions that were no longer deemed “non-complex” could be required to comply with the standards applicable to complex banking organizations or to take other remedial steps. For an institution transitioning from the non-complex framework to the complex regime, an adjustment period might be necessary to meet reporting and capital requirements.

Establishment of a process for monitoring on-going eligibility for the simplified framework should also be considered. The process used to collect and report data should not undermine burden reduction, one of the primary objectives of a non-complex framework.

Question 17: How could the non-complex capital adequacy framework be initially implemented and thereafter applied on an ongoing basis?

Question 18: Should banking organizations no longer deemed “non-complex” be required to comply with the otherwise applicable capital standards? What other alternatives could be made available for these banking organizations? What types of transition would be most appropriate?

III. OCC and OTS Executive Order 12866 Determination

The Comptroller of the Currency and the Director of the Office of Thrift

Supervision have determined that this advance notice of proposed rulemaking does not constitute a significant regulatory action under Executive Order 12866.

Dated: October 26, 2000.

John D. Hawke, Jr.,
Comptroller of the Currency.

By order of the Board of Governors of the Federal Reserve System, October 23, 2000.

Jennifer J. Johnson,
Secretary of the Board.

By order of the Board of Directors.

Dated at Washington, DC, this 17th day of October, 2000.

Federal Deposit Insurance Corporation.

Robert E. Feldman,
Executive Secretary.

Dated: October 19, 2000.

By the Office of Thrift Supervision.

Ellen Seidman,
Director.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000-NM-70-AD]

RIN 2120-AA64

Airworthiness Directives; Airbus Model A319, A320, and A321 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to all Airbus Model A319, A320, and A321 series airplanes. This proposal would require revising the Airworthiness Limitations Section of the Instructions for Continued Airworthiness to incorporate service life limits for certain items and inspections to detect fatigue cracking, accidental damage, or corrosion in certain structures. This proposal is prompted by issuance of a revision to Airbus Industrie A319/A320/A321 Maintenance Planning Document and Airworthiness Limitation Items document, which specify new or more restrictive compliance times for structural inspection and replacement action. The actions specified by the proposed AD are intended to ensure the structural integrity of these airplanes.

DATES: Comments must be received by December 4, 2000.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-114, Attention: Rules Docket No. 2000-NM-70-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227-1232. Comments may also be sent via the Internet using the following address: 9-anm-nprmcomment@faa.gov. Comments sent via fax or the Internet must contain "Docket No. "2000-NM-70-AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM-116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (425) 227-2110; fax (425) 227-1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.

- For each issue, state what specific change to the proposed AD is being requested.

- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic,

environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2000-NM-70-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-114, Attention: Rules Docket No. 2000-NM-70-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion

The Direction Generale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, has notified the FAA that a revision to Section 9-1 of the Airbus Industrie A319/A320/A321 Maintenance Planning Document (MRB) has been issued. That revised section provides the service life limits for certain items. In addition, a revision to Issue 3 of Airbus Industrie A319/A320/A321 Airworthiness Limitation Items (ALI) has been issued, which provides an inspection program to detect fatigue corrosion, accidental damage, and corrosion in certain structures. [The FAA refers to the information included in Section 9-1 of the MRB and Issue 3 of the ALI as the Airworthiness Limitations Sections (ALS) of the Instructions for Continued Airworthiness.] These revisions affect all Airbus Model A319, A320, and A321 series airplanes. The revisions to the MRB and ALI documents provide mandatory replacement times and structural inspection intervals approved under section 25.571 of the Joint Aviation Requirements and the Federal Aviation Regulations (14 CFR 25.571). As airplanes gain service experience, or as results of post-certification testing and evaluation are obtained, it may become necessary to add new or more restrictive life limits or structural inspections in order to ensure the continued structural integrity of the airplane.

The DGAC advises that analysis of fatigue test data has revealed that

certain inspections must be performed at specific intervals to preclude fatigue cracking in certain areas of the airplane. In addition, the DGAC advises that certain service life limits must be imposed for various components on these airplanes to preclude the onset of fatigue cracking in those components. Such fatigue cracking, if not corrected, could adversely affect the structural integrity of these airplanes.

Explanation of Relevant Service Information

Airbus Industrie has issued Section 9-1, "Life Limits/Monitored Parts," Revision 1, dated August 13, 1999, of Airbus Industrie A319/A320/A321 Maintenance Planning Document (MPD), Volume 1. (The service life limits of revision 20 and on of Chapter 05-11-00 of the Aircraft Maintenance Manual were moved to Section 9-1 of the MPD to provide data to enable traceability and monitoring of selected parts for the airplanes.) Airbus Industrie also issued A319/A320/A321 Airworthiness Limitation Items (ALI), AI/SE-M4/95A.0252/96, Issue 3, dated May 27, 1999, which specifies inspection procedures, thresholds, and intervals for structural significant items (SSIs). The ALI document specifies new or more restrictive inspection and replacement actions. Accomplishment of the actions specified in these documents is intended to adequately address the identified unsafe condition.

The DGAC has approved the revisions to the MPD and ALI documents in order to assure the continued airworthiness of these airplanes in France. The DGAC has not issued a corresponding airworthiness directive, although accomplishment of the new or more restrictive life limits and structural inspections contained in Section 9-1 of the MPD and in Issue 3 of the ALI documents may be considered mandatory for operators of these airplanes in France.

FAA's Conclusions

The FAA has reviewed the revisions to Section 9-1 of the MPD and Issue 3 of the ALI documents and all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States. Pursuant to the bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. These airplane models are manufactured in France and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral

airworthiness agreement. The FAA has determined that the revisions to Section 9–1 of the MPD and to Issue 3 of the ALI documents must be incorporated into the Airworthiness Limitations Section (ALS) of the Instructions for Continued Airworthiness.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require a revision to the ALS of the Instructions for Continued Airworthiness to incorporate inspections to detect fatigue cracking of certain Significant Structural Items (SSIs) and to revise life limits for certain equipment and various components that are specified in the previously referenced maintenance document.

Explanation of Action Taken by the FAA

In accordance with airworthiness standards requiring “damage tolerance assessments” for transport category airplanes (section 25.1529 of the Federal Aviation Regulations (14 CFR 25.1529), and the Appendices referenced in that section), all products certificated to comply with that section must have Instructions for Continued Airworthiness (or, for some products, maintenance manuals) that include an ALS. That section must set forth:

- Mandatory replacement times for structural components,
- Structural inspection intervals, and
- Related approved structural inspection procedures necessary to show compliance with the damage-tolerance requirements.

Compliance with the terms specified in the ALS is required by sections 43.16 (for persons maintaining products) and 91.403 (for operators) of the Federal Aviation Regulations (14 CFR 43.16 and 91.403).

In order to require compliance with these inspection intervals and life limits, the FAA must engage in rulemaking, namely the issuance of an AD. For products certificated to comply with the referenced part 25 requirements, it is within the authority of the FAA to issue an AD requiring a revision to the ALS that includes reduced life limits, or new or different structural inspection requirements. These revisions then are mandatory for operators under section 91.403(c) of the Federal Aviation Regulations (14 CFR 91.403), which prohibits operation of an airplane for which airworthiness limitations have been issued unless the

inspection intervals specified in those limitations have been complied with.

After that document is revised, as required, and the AD has been fully complied with, the life limit or structural inspection change remains enforceable as a part of the airworthiness limitations. (This is analogous to AD’s that require changes to the Limitations Section of the Airplane Flight Manual.)

Requiring a revision of the airworthiness limitations, rather than requiring individual inspections, is advantageous for operators because it allows them to record AD compliance status only once—at the time they make the revision—rather than after every inspection. It also has the advantage of keeping all airworthiness limitations, whether imposed by original certification or by AD, in one place within the operator’s maintenance program, thereby reducing the risk of non-compliance because of oversight or confusion.

Cost Impact

The FAA estimates that 36 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is \$60 per work hour. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be \$2,160, or \$60 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft

regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Docket 2000–NM–70–AD.

Applicability: All Model A319, A320, and A321 series airplanes, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To ensure continued structural integrity of these airplanes, accomplish the following:

Airworthiness Limitations Revision

(a) Within 30 days after the effective date of this AD, revise the Airworthiness Limitations Section (ALS) of the Instructions for Continued Airworthiness by incorporating Section 9–1, “Life Limits/ Monitored Parts,” Revision 1, dated August 13, 1999, of the Airbus A319/A320/A321 Maintenance Planning Document, Volume 1, and Airbus Industrie A319/A320/A321 Airworthiness Limitation Items AI/SE–M4/ 95A.0252/96, Issue 3, dated May 27, 1999, into the ALS.

(b) Except as provided by paragraph (c) of this AD: After the actions specified in paragraph (a) of this AD have been accomplished, no alternative inspections or

inspection intervals may be approved for the structural elements specified in the document listed in paragraph (a) of this AD.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM-116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM-116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM-114.

Special Flight Permits

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on October 27, 2000.

Donald L. Riggins,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF EDUCATION

34 CFR Parts 75 and 350

Direct Grant Programs and Disability and Rehabilitation Research Projects and Centers Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the Education Department General Administrative Regulations (EDGAR) and the regulations for the National Institute on Disability and Rehabilitation Research (NIDRR). The proposed amendments to EDGAR would revise the general selection criteria concerning project design, services, and personnel available for use in direct grant programs. Consistent with the requirements of section 427 of the General Education Provisions Act (GEPA), these amendments would focus on ensuring that discretionary grant applicants demonstrate in their applications the steps they will take to ensure equitable access to, and participation in, their federally assisted programs by members of traditionally underrepresented groups. The proposed amendment to the criterion on quality of project personnel also would add a

mandatory factor measuring the extent to which the application includes effective strategies for employing and advancing in employment qualified individuals with disabilities in the proposed project, including the accessibility of the project's worksite and equipment to these individuals. The Secretary also proposes to include the latter amendment concerning project personnel in the regulations providing selection criteria for certain programs administered by the NIDRR.

DATES: We must receive your comments on or before January 2, 2001.

ADDRESSES: Address all comments about these proposed regulations to Julius C. Cotton, U.S. Department of Education, 400 Maryland Avenue, SW., room 3652, ROB-3, Washington, DC 20202-4248. If you prefer to send your comments through the Internet, use the following address: comments@ed.gov.

You must include the term "proposed selection criteria" in the subject line of your electronic message.

FOR FURTHER INFORMATION CONTACT:

Julius C. Cotton. Telephone: (202) 708-8562. If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1-800-877-8339.

Individuals with disabilities may obtain this document in an alternative format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT**.

SUPPLEMENTARY INFORMATION:

Invitation To Comment

We invite you to submit comments regarding these proposed regulations and the potential effect of the use of the proposed selection criteria in direct grant programs supported by the Department.

We invite you to assist us in complying with the specific requirements of Executive Order 12866 and its overall requirement of reducing regulatory burden that might result from these proposed regulations. Please let us know of any further opportunities we should take to reduce potential costs or increase potential benefits while preserving the effective and efficient administration of the Department's direct grant programs.

During and after the comment period, you may inspect all public comments about these proposed regulations in room 3652, ROB-3, Seventh & D Streets, SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Eastern time, Monday through Friday of each week except Federal holidays.

Assistance to Individuals With Disabilities in Reviewing the Rulemaking Record

On request, we will supply an appropriate aid, such as a reader or print magnifier, to an individual with a disability that needs assistance to review the comments or other documents in the public rulemaking record for these proposed regulations. If you want to schedule an appointment for this type of aid, you may call (202) 205-8113 or (202) 260-9895. If you use a TDD, you may call the Federal Information Relay Service at 1-800-877-8339.

Background

The Department of Education's mission is to ensure equal access to education and promote educational excellence throughout the nation. To ensure that these goals are being met in Department-funded discretionary grant programs, we are proposing several changes to the list of general selection criteria and factors in EDGAR. These EDGAR criteria and factors are used by most programs of the Department. Many programs do not have separate criteria and rely entirely on EDGAR criteria. Other programs have separate regulatory criteria. EDGAR authorizes the programs with separate criteria to use program criteria (and statutory criteria) in conjunction with the EDGAR criteria to evaluate applications. As a result, these amendments would affect most programs of the Department. We propose to amend the NIDRR regulations which do not incorporate the EDGAR provision that permits the use of both EDGAR and program criteria.

The proposed changes stem from two related departmental efforts that have the common goal of ensuring equity and excellence in Department-funded grant projects. The first effort relates to current requirements found in section 427 of the General Education Provisions Act (GEPA) (20 U.S.C. 1228a), which was enacted by Congress in 1994. Section 427 of GEPA requires that each applicant for a Department grant include in its application a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its federally assisted programs for students, teachers, and other program beneficiaries with special needs by addressing barriers to that access and participation, including barriers based on gender, race, national origin, color, disability, or age. The Secretary is prepared to provide technical assistance to applicants in connection with meeting the
