

Estimated number of respondents: 40 (total).

Frequency of response: Annual; however, the Agency encourages more frequent reporting to provide more up-to-date information to the public.

Total estimated burden: 254,634 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$17,663,581 (per year), includes \$7,222,280 annualized capital or operation & maintenance (O&M) costs.

Changes in Estimates: There is an increase of 162,750 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is in response to feedback to better account for labor costs and to structure the ICR to better align with the burden associated with the present program. Specifically, the increase is due to three main reasons: (1) the existing ICR did not fully capture the respondent labor associated with collecting water quality samples, (2) the restructuring of actions into developmental and annual grant activities and subsequent recalculation of the associated burden, and (3) the anticipated addition of one tribal respondent. The total respondent cost increased by \$2.1M, due to the changes described, an increase in the cost to analyze water samples, and slight increases in the salary rates. However, this increase is offset by a \$4.3M decrease in respondent O&M cost resulting from using actual respondent sampling frequency data rather than previous estimates that overcounted sampling. Agency burden and cost increased by 117 hours because the existing ICR did not capture some of the labor associated with the administration of beach grants or the Agency O&M cost for contractor assistance to jurisdictions with data submission and maintaining the statutorily required database.

Deborah Nagle,

Director, Office of Science and Technology, Office of Water.
