

models and any updated scientific data. Additionally, the U.S. Army Center for Health Promotion and Prevention Medicine (USACHPPM) has overseen an initiative to re-evaluate existing AELs for chemical warfare agents and to develop new levels based on currently accepted risk assessment approaches and incorporation of data which has recently become available.

Purpose: The purpose of this meeting is to review the AELs set for GA, GB, and VX based on the 1988 recommendations from CDC and determine modifications required to update these limits to reflect current findings. Based on new risk assessment models and any available scientific data, CDC will engage nerve agent experts and the public in an evaluation of the current limits and recommend updated limits based on the public comments.

To facilitate the public dialogue, CDC will provide a forum for general public interaction and serve as a vehicle for members of the public to provide their individual concerns.

Matters To Be Discussed: Agenda items include (1) presentation of newly developed risk assessment models and scientific data, (2) panel discussion by nerve agent specialists, (3) recommended modifications to existing levels based on panel comments, and (4) collect public comments on proposed new AELs.

There will be time for public input, questions, and comments.

Agenda items are subject to change as priorities dictate.

Submission for OMB Review; Comment Request

Title: Information Collection Items in the Head Start Performance Standards (current rule).

OMB No.: 0970-0148.
Description: The Head Start Performance Standards are regulations which establish standards for Head Start grantee and delegate agencies to follow to administer quality programs as required by law. Local programs are monitored for compliance with these standards. The information collection aspects of the Performance Standards are one part of the many actions that local agencies must take to ensure they administer quality programs. Almost all these information collection items are record keeping requirements such as recording: nutrition assessment data, family Partnership development, and regular volunteer screening for tuberculosis. These records are intended to act as a management tool for grantees to use in their daily operations. Such records are maintained by the grantees and are not information items which must be collected and then forwarded to the Federal government.

Respondents: Head Start grantee and delegate agencies

Annual Burden Estimates:

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Head Start Performance Standards	2,472	1	594	1,468,626
Estimated Total Annual Burden Hours.				1,468,626

Additional Information: Copies of the proposed collection may be obtained by writing to The Administration for Children and Families, Office of Information Services, 370 L'Enfant

Promenade, SW, Washington, DC 20447, Attn: ACF Reports Clearance Officer.
OMB Comment: OMB is required to make a decision concerning the collection of information between 30

and 60 days after publication of this document in the *Federal Register*. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written
