## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 15275–000]

### Joe Stephens; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On May 31, 2022, Mr. Joe Stephens filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Joe Stephens Small Hydroelectric Power #1 (Small Hydroelectric Power #1 or project) to be located on the east coast of Baranof Island, near Sitka, Alaska. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) a lake with a surface area of 148 acres, having a total storage capacity of 45,000,000 cubic-feet at a normal maximum operating elevation of 460 feet above mean sea level (msl); (2) an intake structure at a set distance below the lake level that will limit the amount of potential draw down; (3) an approximately 1,000 foot penstock (engineering specifications still to be determined); (4) a power house; (5) a single 500-kW turbine; (6) an approximately 100 foot tailrace conduit connecting the turbine outlet with Nelson Bay; (7) a charging station that will supply power to floating vessels in the vicinity of the project; and (8) appurtenant facilities.

The estimated annual generation of the Project would be 4,104 MW-hr.
