[Project No. 15315–000]

County of Coconino, AZ; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On June 12, 2023, Western Navajo Pumped Storage 2, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the to be located near the City of Page in Coconino County, Arizona. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The project is proposed as a closed loop pumped storage hydroelectric-generating facility, which would involve the construction of new water storage, water conveyance, and generation facilities at off-channel locations where no such facilities exist at this time. The project would utilize water from Lake Powell to fill and periodically refill the project reservoirs. The lower reservoir would be located approximately 4,200 feet west from the proposed upper reservoir. A zoned rockfill embankment dike approximately 75 feet high and 6,200 feet long is proposed to be constructed to enclose the perimeter of the 55-acre lower reservoir with a water surface elevation of 5,475 feet mean sea level (msl). The upper reservoir would be located approximately 4,200 feet east from the proposed lower reservoir. A zoned rockfill embankment dike approximately 75 feet high and 6,500 feet long is proposed to be constructed to enclose the perimeter of the 55-acre upper reservoir with a water surface elevation of 6,475 feet msl. Both embankment ring dikes would have an impermeable clay core and an impermeable concrete liner.

During pumping operations, water would be drawn through the four reversible Francis pump-turbine units into four 12-foot-diameter steel pipes that would merge into a 24 foot-diameter penstock, which would convey water to the upper reservoir. During generation, operations would be reversed. The total installed generation

capacity would be 396 megawatts with a hydraulic head of 1,000 feet.

The proposed project would also include a new 30-mile-long, 230-kilovolt overhead transmission line that would extend from a proposed substation near the proposed powerhouse to an interconnection point with the substation located adjacent to Glen Canyon Dam approximately 2 miles northwest of Page, Arizona. The transmission route would follow an approximately 150-foot-wide corridor west until the proposed route meets an existing 200-foot-wide transmission corridor. The proposed substation would include two 200 MVA Generator Step-up Units, relays and controls, breakers, and switches as required by the existing substation owner/electric service provider.

[Project No. 6115-000]

Pyrites Hydro, LLC; Notice of Authorization for Continued Project Operation

The license for the Pyrites Hydroelectric Project No. 6115 was issued for a period ending August 31, 2023.

Section 15(a)(1) of the FPA, 16 U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year-to-year an annual license to the then licensee(s) under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of as provided in section 15 or any other applicable section of the FPA. If the project’s prior license waived the applicability of section 15 of the FPA, then, based on section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at 18 CFR 16.21(a), if the licensee of such project has filed an application for a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to section 15 of the FPA, notice is hereby given that an annual license for Project No. 6115 is issued to Pyrites Hydro, LLC for a period effective September 1, 2023, through August 31, 2024, or until the issuance of a new license for the project or other disposition under the FPA, whichever comes first. If issuance of a new license (or other disposition) does not take place on or before August 31, 2024, notice is hereby given that, pursuant to 18 CFR 16.18(c), an annual license under section 15(a)(1) of the FPA is renewed automatically without further order or notice by the Commission, unless the Commission orders otherwise.

If the project is not subject to section 15 of the FPA, notice is hereby given that Pyrites Hydro, LLC is authorized to continue operation of the Pyrites Hydroelectric Project under the terms and conditions of the prior license until the issuance of a subsequent license for
