

features, or analyze environmental effects.

We are particularly interested in hearing about any potential issues, which are defined as points of discussion, dispute, or debate about the effects of the proposed action. Your participation will help the interdisciplinary team develop effective, issue-driven alternatives and mitigations to the proposed action as needed. It is important that reviewers provide their comments at such times and in such a manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

The project was originally proposed as an environmental assessment, and an opportunity for public scoping comments was provided between December 18, 2013 and January 24, 2014. The proposed action in the EA has been modified for the EIS. If you previously commented on the project, your comments have been and will continue to be considered in the development of alternatives. In order to move forward with this project, we ask that you do not repeat your comments. Following alternative development, the Forest Service will be providing another opportunity to comment on the alternatives and analysis. If you have any new comments, we welcome those at this time.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public project record for this proposed action. Comments submitted anonymously will be accepted and considered; however, anonymous comments will not provide the agency with the ability to provide the respondent with subsequent environmental documents.
