

their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.221(b)(5) and 19 CFR 351.213(h)(1).

Dated: March 17, 2025.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Atlantic Coastal Fisheries Cooperative Management Act Provision; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, has made a preliminary determination that an exempted fishing permit renewal application from the Massachusetts Division of Marine Fisheries (MA DMF) contains all of the required information and warrants further consideration. The exempted fishing permit (EFP) would allow federally permitted fishing vessels to fish outside fishery regulations in support of exempted fishing activities proposed by the applicant. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act and the Atlantic Coastal Fisheries

Cooperative Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

DATES: Comments must be received on or before April 7, 2025.

ADDRESSES: You may submit written comments by email at nmfs.gar.efp@noaa.gov, subject line “MA DMF 2025 Ventless Trap EFP.”

All comments received are a part of the public record and may be posted for public viewing without change. All personal identifying information (*e.g.*, name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “anonymous” as the signature if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Christine Ford, Fishery Management Specialist, christine.ford@noaa.gov, 978–281–9185.

SUPPLEMENTARY INFORMATION: The MA DMF submitted a complete application for an EFP to conduct commercial fishing activities that the regulations would otherwise restrict. This EFP would exempt the participating vessels from the following Federal regulations:

TABLE 1—REQUESTED EXEMPTIONS

CFR citation	Regulation	Need for exemption
50 CFR 697.21(c)(1) and (2)	Gear specification requirements for Lobster Management Areas 1 and 2.	To allow for the use of traps without escape vents.
50 CFR 697.19(a) and (b) ...	Trap limit requirements for Areas 1 and 2	To allow for trap limits to be exceeded.
50 CFR 697.19(i)	Trap tag requirements	To allow for alternatively tagged traps.
50 CFR 697.20(a)(2), 697.20(b)(2), 697.20(a)(3), and 697.20(b)(3).	Minimum and maximum carapace length requirements for Areas 1 and 2.	To allow sub-legal and over-sized lobsters to be landed for research purposes.
50 CFR 697.20(g)(1) and (3)	V-notch possession requirement for Areas 1 and 2	To allow landing of female lobsters for research purposes.
50 CFR 697.20(d)(1) and (3)	Berried female possession requirements	To allow landing of egg-bearing female lobsters for research purposes.
50 CFR 697.20(h)(1)	Minimum carapace width requirements	To allow sub-legal Jonah crabs to be landed for research purposes.
50 CFR 697.20(h)(2)(i) and (ii).	Berried female possession requirement	To allow landing of egg-bearing female Jonah crabs for research purposes.

TABLE 2—PROJECT SUMMARY

Project title	2025 MA DMF Ventless Trap Survey.
Project start	05/26/2025.
Project end	10/31/2025.
Project objectives	To provide fishery-independent data on lobster and Jonah crab growth and abundance within Massachusetts State waters.
Project location	Statistical Areas 514 and 538.
Number of vessels	Up to 6.
Number of trips	Up to 70.
Trip duration (days)	1.
Total number of days	Up to 70.
Gear type(s)	Lobster traps.
Number of tows or sets	16 per trip.

TABLE 2—PROJECT SUMMARY—Continued

Duration of tows or sets	3 day soak.
--------------------------------	-------------

Project Narrative

The purpose of this survey is to provide fishery-independent data on lobster and Jonah crab growth and abundance within Massachusetts State waters of statistical areas 514 and 538. MA DMF funds this lobster abundance survey through their commercial and recreational lobster license fees. This survey has occurred annually since 2006. At least one MA DMF scientist would be on board for the sampling trips. MA DMF personnel would not be on board when traps are baited and deployed. Exemptions would not substantively change vessel operations. All catch during sampling trips would be retained temporarily to collect biological data. MA DMF staff may collect lobster and/or Jonah crab, including undersized, oversized, v-notched, and egg-bearing lobsters. Collected samples would be used for research projects on growth and maturity. No catch from the experimental traps would be landed for sale. All gear would be Atlantic Large Whale Take Reduction Plan compliant. Each trawl consists of six traps, with three vented and three ventless traps alternated along the string. Survey traps would be tagged as, “MA DMF Ventless Traps.”

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 18, 2025.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Draft 2024 Marine Mammal Stock Assessment Reports

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments and new information.

SUMMARY: NMFS reviewed the Alaska, Atlantic, and Pacific regional marine mammal stock assessment reports (SAR) in accordance with the Marine Mammal Protection Act (MMPA). SARs for marine mammals in the Alaska, Atlantic, and Pacific regions were revised to include new information. NMFS is soliciting public comments on the draft 2024 SARs and requesting new information for strategic stocks that were not updated in 2024.

DATES: Comments must be received by June 20, 2025.

ADDRESSES: The 2024 draft SARs are available in electronic form via the internet at <https://www.fisheries.noaa.gov/national/marine-mammal-protection/draft-marine-mammal-stock-assessment-reports>.

You may submit comments or new information, identified by NOAA–NMFS–2025–0019, via electronic submission through the Federal e-Rulemaking Portal:

Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and type NOAA–NMFS–2025–0019 in the Search box (*note:* copying and pasting the FDMS Docket Number directly from this document may not yield search results). Click on the “Comment” icon, complete the required fields, and enter or attach your comments.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the end of the comment period. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (*e.g.*, name, address, *etc.*), confidential business information, or

otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT:

Zachary Schakner, Office of Science and Technology, 301–427–8106, Zachary.Schakner@noaa.gov; Nancy Young, 206–526–4297, Nancy.Young@noaa.gov, regarding Alaska regional stock assessments; Jessica McCordic, 508–495–2396, jessica.mccordic@noaa.gov, regarding Atlantic regional stock assessments; or Jim Carretta, 858–546–7171, Jim.Carretta@noaa.gov, regarding Pacific regional stock assessments.

SUPPLEMENTARY INFORMATION:**Background**

Section 117 of the MMPA (16 U.S.C. 1361 *et seq.*) requires NMFS and the U.S. Fish and Wildlife Service (USFWS) to prepare stock assessments for each stock of marine mammals occurring in waters under the jurisdiction of the United States. These SARs must contain information regarding the distribution and abundance of the stock, population growth rates and trends, estimates of annual human-caused mortality and serious injury (M/SI) from all sources, descriptions of the fisheries with which the stock interacts, and the status of the stock. Initial SARs were completed in 1995.

The MMPA requires NMFS and USFWS to review the SARs at least annually for strategic stocks and stocks for which significant new information is available and at least once every three years for non-strategic stocks. The term “strategic stock” means a marine mammal stock: (A) for which the level of direct human-caused mortality exceeds the potential biological removal level or PBR (defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population); (B) which, based on the best available scientific information, is declining and is likely to be listed as a threatened species under the Endangered Species Act (ESA) within the foreseeable future; or (C) which is listed as a threatened species or endangered species under the ESA or is designated as depleted under the
