SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for renewal of an approved information collection. NOAA Fisheries, Southeast Fisheries Science Center, annually collects economic data from commercial fishermen in the Gulf and South Atlantic shrimp fisheries who hold one or more permits for harvesting shrimp from federal waters (U.S. Exclusive Economic Zone). A collection of economic information from fishers affected by the management of federal commercial fisheries is needed to ensure that national goals, objectives, and requirements of the Magnuson-Stevens Fishery Conservation and Management Act (MFCMA) and other laws are met. These data are needed to conduct economic analyses in support of management of the shrimp fishery and to satisfy legal requirements. Information about revenues, variable and fixed costs, capital investment and other economic information is collected from a random sample of permit holders. The data will be used to assess how fishermen will be impacted by and respond to federal regulation likely to be considered by fishery managers. No changes are requested with this renewal request.

II. Method of Collection

The information will be collected on paper using a mail survey.
