

alternatives for in-depth evaluation: (a) a new nuclear (Small Modular Reactor) generation alternative, (b) a natural gas combined-cycle power plant, and (c) a combination of natural gas combined-cycle power plant, solar, and demand-side management. The FSEIS documents the environmental review, including the determination that the adverse environmental impacts of subsequent license renewal for Surry Power Station, Units 1 and 2, are not so great that preserving the option of subsequent license renewal for energy planning decisionmakers would be unreasonable. In addition to the NRC staff's independent environmental review, the FSEIS conclusion is based on (1) the analysis and findings in NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Power Plants," (2) information provided in the environmental report submitted by Dominion, (3) consultation with Federal, State, local, and Tribal agencies, and (4) the NRC staff's consideration of public comments.

Surry Power Station, Units 1 and 2, are three-coolant-loop, pressurized light water reactors located on a site situated on Gravel Neck, adjacent to the James River in Surry County, Virginia. The application for the subsequent renewed licenses, "Surry Power Station Units 1 and 2 Application for Subsequent License Renewal," dated October 15, 2018 (ADAMS Package Accession No. ML18291A842), as supplemented by letters dated through April 8, 2021 (ADAMS Package Accession No. ML21112A337), complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC's regulations. As required by the Act and NRC regulations in chapter 1 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC has made appropriate findings, which are set forth in the subsequent renewed licenses.

A public notice of the proposed issuance of the subsequent renewed licenses and an opportunity for a hearing was published in the **Federal Register** on December 10, 2018 (83 FR 63541) and corrected on December 17, 2018 (83 FR 64606). There were no petitions to intervene filed for the Surry subsequent license renewal application.

For further details with respect to this action, see: (1) Virginia Electric and Power Company's subsequent license renewal application for Surry Power Station, Units 1 and 2, dated October 15, 2018, as supplemented by letters dated through April 8, 2021; (2) the NRC's safety evaluation report, dated March 2020 (ADAMS Package Accession No.

ML20052F520); (3) the NRC's final environmental impact statement (NUREG-1437, Supplement 6, Second Renewal) for Surry Power Station Units 1 and 2, dated April 2020; and (4) the NRC's ROD.

Dated: May 4, 2021.
