

Tidal Energy Project to be located in Cook Inlet in the vicinity of Anchorage, Alaska, in the Municipality of Anchorage and Matanuska-Susitna Borough, Alaska. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project will consist of the following: (1) Four 250-kilowatt TideGen turbine-generator modules with a combined capacity of 1 megawatt (MW); (2) an approximately 4,000-foot-long underwater transmission cable from the module site to a shore station on Fire Island; (3) an approximately 4,600-foot-long transmission line connecting the shore station to an interconnection point on Fire Island; and (4) appurtenant facilities. The estimated annual generation of the Cook Inlet project would be 2,628 megawatt-hours.
