Issues for Comment: There may be cases in which the defendant has entered into a conciliation agreement with the Federal Election Commission under section 309 of the Federal Election Campaign Act of 1971 in order to correct or prevent a violation of such Act by the defendant. For such cases, the proposed amendment provides that such an agreement may be an appropriate factor in determining the amount of fine that might be imposed. The Commission requests comment regarding whether the existence of such a conciliation agreement between the defendant and Federal Election Commission should be the basis for a downward adjustment under the proposed guideline (and if so, what should the extent of the adjustment be), or, alternatively, should the Commission discourage downward departures in cases involving conciliation agreements so as to limit the effect such an agreement might have on the criminal penalties imposed?

The Commission also requests comment regarding whether, in contrast to proposed Application Note 2, application of the abuse of position of trust adjustment in § 3B1.3 should be precluded for cases under the proposed guideline.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Proposed Measure and Opportunity for Public Comment Pursuant to Section 421 of the Trade Act of 1974: Pedestal Actuators From the People's Republic of China

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of proposed measure; request for comments.

SUMMARY: The United States International Trade Commission (ITC) has determined, pursuant to section 421(b)(1) of the Trade Act of 1974, as amended (the Trade Act)(19 U.S.C. 2451(b)(1)), that pedestal actuators¹ from the People's Republic of China (China) are being imported into the United States in such increased quantities or under such conditions as to cause market disruption to the domestic producers of like or directly competitive products. Pursuant to section 421(h)(1) of the Trade Act, the United States Trade Representative (USTR) is publishing notice of proposed restrictions with respect to imports of pedestal actuators from China. USTR invites domestic producers, importers, exporters, and other interested parties to submit their views and evidence on the

¹ For purposes of the ITC investigation, pedestal actuators consist of electromechanical linear actuators, imported with or without motors, or as part of scooter subassemblies, all the foregoing used for lifting and lowering, or for pushing or pulling. The product includes any subassembly of pedestal actuator parts and components. Pedestal actuators are powered by fractional horsepower DC or AC motors, which drive a ball bearing screw or acme screw through a gear reducer to convert rotary to linear motion. The products are designed for flat or base mounting, have telescoping members, with bearings or bearing surfaces, and rigidly support the load and provide anti-rotation. Pedestal actuators are provided for in subheadings 8483.40.50 and 8483.40.80 and in heading 8501 of the Harmonized Tariff System of the United States. They are primarily used in mobility scooters and electric wheelchairs.
