NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission, new, revision, or extension: Revision.
2. The title of the information collection: NRC Form 327, Special Nuclear Material (SNM) and Source Material (SM) Physical Inventory Summary Report, and NUREG/BR-0096, Instructions and Guidance for

Completing Physical Inventory Summary Reports.

3. The form number if applicable: NRC Form 327.

4. How often the collection is required: The frequency of reporting corresponds to the frequency of required inventories, which depends essentially on the strategic significance of the SNM covered by the particular license. Certain licensees possessing strategic SNM are required to report inventories every 6 months. Licensees possessing SNM of moderate strategic significance must report every 9 months in accordance with the revised regulation in 10 CFR part 74.43. Licensees possessing SNM of low strategic significance must report annually, except two licensees must report their dynamic inventories every 2 months and a static inventory on an annual basis.

5. Who will be required or asked to report: Fuel facility licensees possessing special nuclear material.

6. An estimate of the number of annual responses: 25 responses.

7. The estimated number of annual respondents: 9 respondents.

8. An estimate of the total number of hours needed annually to complete the requirement or request: 100 hours (an average of approximately 4 hours per response for 25 responses).

9. An indication of whether section 3507(d), Public Law 104-13 applies: N/A.

10. Abstract: NRC Form 327 is submitted by fuel facility licensees to account for special nuclear material. The data is used by NRC to assess licensee material control and accounting programs and to confirm the absence of (or detect the occurrence of) special nuclear material theft or diversion. NUREG/BR-0096 provides specific guidance and instructions for completing the form in accordance with the requirements appropriate for a particular licensee.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by September 21, 2007. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot

be given to comments received after this date. Desk Officer, Office of Information and Regulatory Affairs (3150-0139), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be e-mailed to Nathan.Frey@omb.eop.gov or submitted by telephone at (202) 395-4650.

The NRC Clearance Officer is Margaret A. Janney, 301-415-7245.

Dated at Rockville, Maryland, this 15th day of August, 2007.

For the Nuclear Regulatory Commission.

Margaret A. Janney,

NRC Clearance Officer, Office of Information Services.

NUCLEAR REGULATORY COMMISSION

Public Meeting Notice of Nuclear Energy Institute/U.S. Nuclear Regulatory Commission Working Groups

AGENCY: Nuclear Regulatory Commission.

ACTION: Solicitation of interest in working group participation.

DATES: August 23, 2007.

Time: 8 a.m.

Location: U.S. Nuclear Regulatory Commission, Executive Boulevard Building, 6003 Executive Boulevard, Rooms, EBB-1-B13 and EBB-1-B15, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT:

James Smith, Project Manager, Technical Support Branch, Special Projects and Technical Support Directorate, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, MS EBB2-C40M, Washington, DC 20555-0001. Telephone: (301) 492-3234; fax number: (301) 492-6521; e-mail: jas4@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) held a public workshop with the Nuclear Energy Institute and other stakeholders on June 14, 2007, to discuss certain implementation issues related to the implementation of subpart H of 10 CFR part 70: (1) Part 70, Appendix A Reporting, (2) refinement of the definition of Uranium Solubility under part 70, (3) the use of Digital Instrumentation and Control in safety and process settings, (4) the § 70.72 Facility Change Process, and (5) the possible Enforcement Policy Revisions.

Of the path forward for each of these five issues, four included a short term resolution to address the problem via small working groups comprised of industry and NRC representatives producing a product (white paper) which would ultimately be reviewed/approved by management representatives from both NRC and NEI and/or Industry representative management with an opportunity for members of the public to participate if desired. The exception to this small working group approach was the resolution of the issues associated with the use of Digital Instrumentation and Control in safety and process settings. Since this issue was far reaching, that could impact other nuclear arenas, some already addressing this area already pursuing research in this area, it was proposed that industry participate in the current steering committees involved in addressing these issues and NRC will facilitate interested industry members admission/seating on these committees so that their interests can be heard.

In addition to the small working group approach, for Enforcement Policy Revisions, a multiple day public workshop in Region II with participation by the NRC's Offices of Enforcement and General Counsel should be held to establish the limits to what can be changed in the Enforcement Policy by the small working group.

II. Summary

The purpose of this notice is to provide notice of the date and location of the first kickoff meeting of these small working groups as these white papers are developed. The number of persons participating in these groups will be limited to one or two; therefore, the first one or two person expressing interest in a particular group will have priority for participation in the working group; however, all meetings of these groups will be noticed and open to the public. Please contact the staff contact listed above to express your interest in participating in one or more of these working groups.

Dated at Rockville, Maryland, this 14th day of August 2007.

For the Nuclear Regulatory Commission.

Deborah A. Jackson,

Chief, Technical Support Branch, Special Projects and Technical Support Directorate, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards.
