k. *Description of Request:* Great Lakes Hydro America LLC. (applicant) requests Commission approval for a temporary variance from the normal reservoir elevation to conduct concrete repairs to the forebay headgate structure which were identified in the 11th (2019) Part 12 Inspection Recommendations. The applicant requests to draw down the head pond from elevation of 901.4 feet to 897.2 feet (*i.e.*, 4.2 feet from normal operating level) for a period of approximately twelve weeks beginning in June 2023 to dewater the concrete areas in need of repair. The applicant would lower the head pond at a rate not to exceed 3 inches per hour to avoid potential fish stranding and maintain the minimum required bypass flow of 6 cubic feet per second via leakage (consistent with operations during routine flashboard replacement). Once the repairs are completed, the head pond will be refilled at a rate not to exceed 3 inches per hour. The applicant requests the temporary variance to

remain into effect until the end of September 2023.
