

teleconference meeting the Board will discuss the draft findings and recommendations of the Science and Mathematics Education (SME) Task Force. The Task Force is a subcommittee of the Secretary of Energy Advisory Board. It was formed to provide the Board and the Secretary of Energy with advice on how the DOE could most effectively utilize its scientific and technical resources, including its national laboratories, to inspire, educate, and encourage a new generation of career scientists and engineers to meet the challenges of the future and to enhance the scientific literacy of the nation. The Task Force was also asked to recommend short-term and long-term initiatives that the Department and its national laboratories should pursue to leverage their resources to address the need for skilled scientists, engineers and technicians, and to achieve the scientific and technical advances essential to our future and the security of the nation. The Task Force's recommendations were requested to complement the major efforts of the National Science Foundation, National Aeronautics and Space Administration, Department of Education, and other federal agencies.

On May 19th, the Board will conduct a teleconference to discuss the findings and recommendations contained in the draft final report of the Science and Mathematics Education Task Force.

Title: Acid Rain Program.

ICR numbers: EPA ICR No. 1633.14, OMB Control No. 2060-0258.

ICR status: This ICR is currently scheduled to expire on June 30, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a current valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Acid Rain Program was established under Title IV of the 1990 Clean Air Act Amendments. The program calls for major reductions of the pollutants that cause acid rain while establishing a new approach to environmental management. This information collection is necessary to implement the Acid Rain Program. It includes burden hours associated with developing and modifying permits, transferring allowances, obtaining allowances from the conservation and renewable energy reserve, monitoring emissions, participating in the annual auctions, completing annual compliance certifications, participating in the Opt-in program, and complying with NO_x permitting requirements. Most of this information collection is mandatory under 40 CFR parts 72-78. Some parts of it are voluntary or to obtain a benefit, such as participation in the annual auctions under 40 CFR part 73, subpart E.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 110 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Electric Utilities, Industrial Sources, and other persons.

Estimated Number of Respondents: 1,700.

Frequency of Response: On occasion, quarterly, and annually.

Estimated Total Annual Hour Burden: 1,971,276.

Estimated Total Annual Cost: \$262,369,989, which includes \$71,307,000 annualized capital/startup costs, \$70,951,000 annual O&M costs, and \$120,111,989 annual labor costs.

Changes in the Estimates: There is an increase of 370,469 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to adjustments (379,044 hours), with changes in program requirements decreasing the burden (8,575 hours).

Dated: April 27, 2006.

Oscar Morales,

Director, Collection Strategies Division.
