This suite of NOAA services supports safe and efficient navigation, the Blue Economy, resilient coasts and communities, and the nationwide positioning information infrastructure to support America's climate needs and commerce. Specifically, the HSRP will consider:

- National Ocean Service programs' recent activities, such as updates to the National Spatial Reference System, datums, national ocean and coastal mapping goals, hydrographic surveying, nautical charting, uncrewed systems, coastal remote sensing and bathymetric lidar, photogrammetry, positioning, sea level rise, and water levels in support of "seamless data."
- The status of NOAA's navigation services in the context of recent legislation.
- Measuring, monitoring, and mitigating flooding and sea level change and the contribution of NOAA's critical foundational geospatial data to projects.
- NOAA navigation data, products, and services that enable further economic growth and impact safe navigation.
- Other topics related to NOAA programs and activities, such as bathymetric and coastal/ocean modeling, tide and current observations, resilience and coastal data and

information systems to support planning for climate change in ports and coastal communities, flooding/inundation, contributions to the Blue Economy, Physical Oceanographic Real-Time System (PORTS®) sensor enhancements and expansion, Precision Marine Navigation, the transition from raster paper charts to Electronic Navigational Charts, geodetic observations, gravity modeling, data stewardship, education and training to sustain the workforce necessary for NOAA navigation services missions, and scientific mapping and technology research projects tied to cooperative agreements between NOAA and other partners.
