Two cross-phthalate TSDs were released to the public in May 2025 through the DBP (EPA-HQ-OPPT-2018-0503), DEHP (EPA-HQ-OPPT-2018-0433), and SACC (EPA-HQ-OPPT-2024-0551) dockets: *Draft Cancer Human Health Hazard Assessment for Di(2-ethylhexyl) Phthalate (DEHP), Dibutyl Phthalate (DBP), BBP, DIBP, and DCHP and Revised Draft Technical Support Document for the Cumulative Risk Analysis of DEHP, DBP, BBP, DIBP, DCHP, and DINP Under the Toxic Substances Control Act*. These TSDs have been added to the dockets for BBP (EPA-HQ-OPPT-2018-0501), DIBP (EPA-HQ-OPPT-2018-0434), and DCHP (EPA-HQ-OPPT-2018-0504).

IV. Next Steps

After consideration of comments received from the public and the SACC on the draft risk evaluations of BBP, DIBP, revised draft cumulative risk analysis, and other phthalates included in the peer review, EPA will issue final risk evaluations for BBP and DIBP.

Under TSCA section 6, EPA must determine in the final risk evaluations, based on the weight of scientific evidence, whether or not the chemicals present an unreasonable risk to health or the environment under the chemical's conditions of use. This includes consideration of risks to potentially exposed susceptible subpopulations who may be at greater risks than the general population, such as children and workers. TSCA prohibits EPA from considering non-risk factors (*e.g.*, costs/benefits) during risk evaluation.

If EPA determines in its final risk evaluation that a chemical presents an unreasonable risk to health or the environment, the chemical will move to risk management action under TSCA section 6(a) for the relevant conditions of use. EPA would be required to implement, via regulation, regulatory restrictions on the manufacture (including import), processing, distribution, use or disposal of the chemical to the extent necessary to eliminate the identified unreasonable risk. TSCA section 6 includes a range of risk management options that can be applied alone or in combination, including labeling, recordkeeping or notice requirements, actions to reduce human exposure or environmental release, or prohibition of the chemical or of certain uses. Like the prioritization and risk evaluation processes, there would be an opportunity for public comment on any proposed risk management actions.
