

portion of the Northwest Atlantic Ocean will result, at worst, in a temporary modification in behavior by certain species of marine mammals. This activity is expected to result in no more than a negligible impact on the affected species.

While the number of potential incidental harassment takes will depend on the distribution and abundance of marine mammals in the vicinity of the survey activity, the number of potential harassment takings is estimated to be small. In addition, no take by injury and/or death is anticipated, and the potential for temporary or permanent hearing impairment is low and will be avoided through the incorporation of the mitigation measures mentioned in this document. In addition, the proposed seismic program will not take place in or near subsistence hunting areas.

#### Proposed Authorization

NMFS proposes to issue an IHA to LDEO for conducting a seismic survey program in the Bermuda Rise portion of the Northwest Atlantic Ocean, provided the proposed mitigation, monitoring, and reporting requirements are incorporated. NMFS has preliminarily determined that the proposed activity would result in the harassment of small numbers of marine mammals; would have no more than a negligible impact on the affected marine mammal stocks; and would not have an unmitigable adverse impact on the availability of stocks for subsistence uses.

#### Information Sought

NMFS requests interested persons to submit comments and information concerning this request (see **ADDRESSES**).
