**Abstract:** The New Source Performance Standards (NSPS) for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction or Modification Commenced After June 11, 1973 and Prior to May 19, 1978 (40 CFR part 60, subpart K) apply to existing facilities for which construction, reconstruction, or modification commenced after June 11, 1973 and prior to May 19, 1978 that store petroleum liquids in storage vessels with a storage capacity greater than 151,416 liters (40,000 gallons), including: storage vessels with capacity greater than 151,416 liters (40,000 gallons), but not exceeding 246,052 liters (65,000 gallons). In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required of all affected facilities subject to NSPS.

**Form Numbers:** None.

**Respondents/affected entities:**

Owners and operators of storage vessels subject to 40 CFR part 60, subpart K.

**Respondent's obligation to respond:** Mandatory (40 CFR part 60, subpart K)

**Estimated number of respondents:** 281 (total).

**Frequency of response:** Occasionally.

**Total estimated burden:** 1,310 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$154,000 (per year), which includes \$0 for annualized capital/startup and/or operation & maintenance costs.

**Changes in the Estimates:** The increase in burden from the most-recently approved ICR is due to an adjustment. The previously approved ICRs (1797.08, 1797.07) relied on information from the 2011 Petroleum Refinery ICR for estimates of facilities with storage tanks subject to 40 CFR part 60, subpart K, which was the best source of information at that time. However, this ICR updates the number

of facilities based on data from EPA's ECHO database, which tracks a total of 281 refineries, terminals, and other facilities that report information under 40 CFR part 60, subpart K. This estimate is a more-recent estimate of affected sources and is similar to those estimates conducted in prior ICRs (*e.g.*, 1797.06) and reflects the Agency's best knowledge of actual subject entities. However, we expect this number may be lower as facilities that modify tanks initially subject to subpart K would become subject to other regulations, *e.g.*, 40 CFR part 60, subpart Kb. Finally, there is no change in both capital/startup and O&M costs compared to the prior ICR renewal.

Director, Regulatory Support Division.

#### SUPPLEMENTARY INFORMATION:

##### I. Executive Summary

###### A. What action is the Agency taking?

This document provides the receipt and status reports for the period from 05/01/2022 to 05/31/2022. The Agency is providing notice of receipt of PMNs, SNUNs, and MCANs (including amended notices and test information); an exemption application under 40 CFR part 725 (Biotech exemption); TMEs, both pending and/or concluded; NOCs to manufacture a new chemical substance; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review.

EPA is also providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCANs and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCANs notices on its website at: <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices>. This information is updated on a weekly basis.

###### B. What is the Agency's authority for taking this action?

Under the Toxic Substances Control Act (TSCA), 15 U.S.C. 2601 *et seq.*, a chemical substance may be either an "existing" chemical substance or a "new" chemical substance. Any chemical substance that is not on EPA's TSCA Inventory of Chemical Substances (TSCA Inventory) is classified as a "new chemical substance," while a chemical substance that is listed on the TSCA Inventory is classified as an "existing chemical substance." (See TSCA section 3(11).) For more information about the TSCA Inventory please go to: <https://www.epa.gov/tsca-inventory>.

Any person who intends to manufacture (including import) a new chemical substance for a non-exempt commercial purpose, or to manufacture or process a chemical substance in a non-exempt manner for a use that EPA has determined is a significant new use, is required by TSCA section 5 to provide EPA with a PMN, MCAN, or SNUN, as appropriate, before initiating the activity. EPA will review the notice, make a risk determination on the chemical substance or significant new use, and take appropriate action as described in TSCA section 5(a)(3).

TSCA section 5(h)(1) authorizes EPA to allow persons, upon application and under appropriate restrictions, to manufacture or process a new chemical substance, or a chemical substance subject to a significant new use rule (SNUR) issued under TSCA section 5(a)(2), for "test marketing" purposes, upon a showing that the manufacture, processing, distribution in commerce, use, and disposal of the chemical will not present an unreasonable risk of injury to health or the environment. This is referred to as a test marketing exemption, or TME. For more information about the requirements applicable to a new chemical go to: <https://www.epa.gov/oppt/newchems>.

Under TSCA sections 5 and 8 and EPA regulations, EPA is required to publish in the **Federal Register** certain information, including notice of receipt of a PMN/SNUN/MCANs (including amended notices and test information); an exemption application under 40 CFR part 725 (biotech exemption); an application for a TME, both pending and concluded; NOCs to manufacture a new chemical substance; and a periodic status report on the new chemical substances that are currently under EPA review or have recently concluded review.
