AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of intent to prepare a supplemental environmental impact statement.

SUMMARY: By letter dated October 3, 2012, AUC, LLC (AUC) submitted to the U.S. Nuclear Regulatory Commission (NRC) an application for a new source material license. The requested license, or the proposed action, would authorize the construction and operation, and decommissioning of AUC's proposed *in-situ* uranium recovery (ISR, also known as *in-situ* leach) facilities, and would require restoration of the aquifer from which the uranium would be extracted. The proposed facility will be located near the town of Wright, Wyoming in Campbell County. The application was accepted for review by NRC on June 18, 2013. A notice of receipt and availability of the license application, including the Environmental Report (ER), and opportunity to request a hearing was published in the **Federal Register** on August 5, 2013 (78 FR 47427).

SUPPLEMENTARY INFORMATION:

1.0 Background

The purpose of this notice of intent is to inform the public that the NRC will be preparing a site-specific Supplemental Environmental Impact Statement (SEIS) regarding the proposed action in accordance with NRC's regulations in part 51 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions," that implement the National Environmental Policy Act of 1969, as amended (NEPA) (42 U.S.C. 4321 et seq.). The SEIS will tier off of the *Generic Environmental Impact Statement for In-Situ Leach Uranium Milling Facilities* (ISR GEIS) (NUREG-

1910) that was published in 2009. The SEIS will examine the potential environmental impacts of the proposed construction, operation, and decommissioning of the Reno Creek ISR facility. The SEIS will also include an analysis of impacts from the proposed action to historic and cultural resources. The NRC staff will coordinate compliance with the Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA) in parallel with the NEPA process using the process set forth in 36 CFR 800.8(c).

AUC submitted its application for a 10 CFR part 40 license by letter dated October 3, 2012. A notice of receipt and availability of the license application, including the ER, and opportunity to request a hearing was published in the **Federal Register** on August 5, 2013 (73 FR 47427).

The NRC will prepare a SEIS for the issuance of the ISR license to possess and use source material for uranium milling to fulfill 10 CFR 51.20(b)(8) requirements. The purpose of this Notice of Intent is to inform the public that the NRC staff, as part of its review of AUC's application, is preparing a draft SEIS for public comment that will tier off of the ISR GEIS. The GEIS identifies specific areas for consideration on a site specific basis that form the staff's intended scope for this site specific SEIS. While NRC's part 51 regulations do not require scoping for SEISs, the NRC staff is planning to place ads in newspapers serving communities near the proposed site, requesting information and comments from the public regarding the proposed action as well as information about other resources, such as historic and cultural resources, that could be affected by the proposed action. In preparing the SEIS, the NRC staff will also consult with Environmental Protection Agency Region 8, U.S. Fish & Wildlife Service; Wyoming Department of Environmental Quality; Wyoming State Historic Preservation Office; potentially interested Tribes and public interest groups; and Wyoming Game and Fish Department.

The NRC will evaluate the potential environmental impacts associated with the proposed ISR facility in parallel with the safety review of the license application. The environmental evaluation will be documented in draft and final SEISs in accordance with NEPA and NRC's implementing regulations contained in 10 CFR part 51.

2.0 Reno Creek ISR Facilities

The facilities, if licensed, would use ISR technology to extract uranium from the 6,057-acre project site. The facility
