Title: Establishing No-Discharge Zones Under Clean Water Act Section 312 (Renewal).

ICR numbers: EPA ICR No. 1791.05, OMB Control No. 2040-0187.

ICR Status: This ICR is scheduled to expire on June 30, 2008. Under OMB

regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: (A) Sewage No-discharge Zones: The need for EPA to obtain information for the establishment of no-discharge zones (NDZs) for vessel sewage in State waters stems from CWA Section 312(f)(3), (f)(4)(A), and (f)(4)(B), and subsequent regulations at 40 CFR 140.4(a-c). NDZs are established to provide State and local governments with additional protection of waters from treated or untreated vessel sewage. There are 3 ways in which NDZs for vessel sewage can be established. This ICR discusses the information requirements associated with the establishment of NDZs for vessel sewage. The responses to this collection of information are required to obtain the benefit of a sewage NDZ (see 33 U.S.C. 1322). The information collection activities discussed in this ICR do not require the submission of any confidential information. (B) UNDS No-discharge Zones: Under section 312(n) of the Clean Water Act ("Uniform National Discharge Standards for Vessels of the Armed Forces" or "UNDS") NDZs for discharges from Armed Forces vessels may be established by either State prohibition or EPA prohibition following the procedures in 40 CFR Part 1700. UNDS also provides that the Governor of any State may petition EPA and the Secretary of Defense to review any determination or standard promulgated under the UNDS program if there is significant new information that could reasonably result in a change to the determination or standard. This ICR discusses the information that will be required from a State if it decides to establish a NDZ by State prohibition or apply for a NDZ by EPA prohibition, and the information that will be required from a State if it decides to submit a petition for review. The responses to this collection of information are required to obtain the benefit of an UNDS NDZ or a review of an UNDS determination or standard (see 33 U.S.C. 1322(n)). The information collection activities discussed in this

ICR do not require the submission of any confidential information.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 127 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Entities potentially affected by this action are state, local, and tribal governments.

Estimated Number of Respondents: 16.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 2,207 hours.

Estimated Total Annual Cost:

\$100,820 includes \$2,300 annualized capital or O&M costs and \$98,520 labor costs.

Changes in the Estimates: The total hourly estimated burden currently identified in the OMB Inventory of Approved ICR Burdens remains the same; however, the current ICR presents an increase in the total cost due to normal cost inflation.

Dated: June 11, 2008.

Title: NESHAP for Metal Coil Surface Coating Plants (Renewal).

ICR Numbers: EPA ICR Number 1957.05, OMB Control Number 2060-0487

ICR Status: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Metal Coil Surface Coating Plants were proposed (65 FR 44616) on July 18, 2000, promulgated (67 FR 39812) on June 10, 2002, and amended (68 FR 12592) on March 17, 2003. These standards apply to each facility operating a coil coating line and that is a major source of hazardous air pollutants (HAPs). This coating line coats metal coil of thicknesses less than, greater than, or equal to 0.15 millimeters (0.006 inches) thick.

Abstract: Owners or operators must submit notification reports upon construction or reconstruction of any metal coil surface coating plant. Semiannual reports for periods of operation during which the emission limitation has exceeded, or reports certifying that no exceedances have occurred, also are required. Owners and operators must submit notification reports upon the construction, reconstruction, or modification of any metal coil surface coating plant. Also, required is a one-time-only initial notification for new and reconstructed sources. Owners or operators of metal coil surface coating plants subject to the rule must maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the

reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart SSSS, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations listed in 40 CFR part 9 and 48 CFR chapter 15, are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information estimated to average 119 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Metal coil surface coating plants.

Estimated Number of Respondents: 89.

Frequency of Response: Weekly, annually, semiannually, initially and occasionally.

Estimated Total Annual Hour Burden: 19,901.

Estimated Total Annual Cost: \$1,588,365 for labor costs, inclusive, plus O&M costs of \$3,648 and \$00.00 for annualized capital costs.

Changes in the Estimates: There is no change in the labor hours or cost in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. It should be noted that the previous ICR rounded the burden cost down to the nearest one

thousand. In this ICR, the exact cost figure is reported which results in an apparent increase in the cost when, in fact, no increase has occurred.

Since there are no changes in the regulatory requirements and there is no significant industry growth, the labor hours and cost figures in the previous ICR was used in this ICR, and there is no change in burden to industry.
