Deposit Requirements" section of that notice, Commerce inadvertently listed an incorrect cash deposit rate of zero percent for all other producers and/or exporters (all-others).² The correct cash deposit rate for all-others is 0.60 percent.³

Correction

In the **Federal Register** of May 13, 2025, in FR Doc 2025–08406, on page 20281, in the second and third column, correct the first sentence of the "Cash Deposit Requirements" section to read as follows:

The following cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for Surva Roshni, Limited will be zero, the rate established in the final results of this review; (2) for previously reviewed or investigated companies not covered in this review, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this or any previous review or in the original less-than-fair-value (LTFV) investigation but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review or the LTFV investigation, the cash deposit rate will continue to be the all-others rate of 0.60 percent, which is the all-others rate established by Commerce in the LTFV investigation.4

The permit authorizes the holder to conduct research on bottlenose dolphins in the bays, sounds, estuaries, and nearshore coastal waters of Texas in the northwestern Gulf of America. The purpose of the research is to: (1) develop and maintain photo-identification catalogs; (2) characterize fine-scale population structure and dynamics; (3) establish baseline patterns of distribution, habitat use, health, and survival; (4) evaluate dolphin behavior in relation to anthropogenic activities; and (5) identify potential risks to the population. Researchers may take up to 8,670 dolphins annually during vessel surveys for counts, photo-identification, behavioral observation, and passive acoustic recordings. A subset of animals may be biopsy sampled or observed for photogrammetry and blow sampling via an unmanned aircraft system. Up to 50 non-target cetaceans may be unintentionally harassed during surveys and/or approached annually for counts and behavioral observation. The permit is valid for 10 years from the date of issuance.

In compliance with the National Environmental Policy Act of 1969 (42) U.S.C. 4321 et seq.), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.
