VIII. Other Information

The Public Health Service strongly encourages all cooperative agreement and contract recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103-227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of the facility) in which regular or routine education, library, day care, health care, or early childhood development services are provided to children. This is consistent with the HHS mission to protect and advance the physical and mental health of the American people.

Proposed Collection: Evaluation of the Brain Disorders in the Developing World Program of the John E. Fogarty International Center, 0925-New, Fogarty International Center (FIC), National Institutes of Health (NIH).

Need and Use of Information Collection: This study seeks to evaluate the management, effectiveness, and outcomes of the Brain Disorders in the Developing World extramural research program administered by the John E. Fogarty International Center of NIH. The purpose of the Brain Disorders in the Developing World program is to develop collaborative research and capacity building projects on brain disorders throughout life relevant to low- and middle-income countries. Awardees are expected to develop innovative projects that contribute to the long-term goal of building sustainable research capacity in nervous system function and impairment throughout life. Between FY 2003 and 2012, a total of 148 awards were made under the Brain Disorders program, and the total investment by Fogarty and its partners at NIH has been approximately \$75 million. The findings of this evaluation study will provide valuable information concerning: (1) Whether and how the program has met its goal of supporting research and research capacity-building on brain disorders in low- and middle-income countries; (2) the extent to which the program as implemented functions efficiently and effectively; (3) the extent to which the program is consistent with the strategic priorities of Fogarty and its partners at NIH; (4) opportunities to improve upon the current implementation of the program; and (5) models, best practices, and lessons learned that may be applicable to other NIH programs, now and in the future.

OMB approval is requested for 1 year. There are no costs to respondents other than their time. The total estimated annualized burden hours are 123.
