Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Standardized Bycatch Reporting Methodology Omnibus Amendment

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes regulations to implement the Standardized Bycatch Reporting Methodology Omnibus Amendment developed by the Mid-Atlantic and New England Fishery Management Councils. This amendment was developed, in part, to respond to a remand by the U.S. District of Columbia Court of Appeals decision in *Oceana v. Locke*. The amendment also adds various measures to improve and expand on the Standardized Bycatch Reporting Methodology previously in place. The proposed measures include: A new prioritization process for allocation of observers if agency funding is insufficient; bycatch reporting and monitoring mechanisms; analytical techniques and allocation of at-sea fisheries observers; a performance standard; a review and reporting process; framework adjustment and annual specifications provisions; and provisions for industry-funded observers and observer set-aside programs. In addition to responding to the DC Court of Appeals remand, this action is necessary to re-establish and improve the Standardized Bycatch Reporting Methodology for all 13 Greater Atlantic Region Fishery Management Plans, as required under the Magnuson-Stevens Fishery Conservation and Management Act, after the previous methodology was vacated by the 2011 Court order.

DATES: Comments must be received on or before February 20, 2015.
