

registrants 0.10 hours per response, for a total of 36,000 response hours.

A total of 7,875 SAM registrants would be required to enter actual values for their top five most highly compensated executives. It is estimated that it would require these 7,875 registrants 2.5 hours to provide the information required, for a total of 19,688 response hours.

Therefore, it is estimated that the total population of respondents is 367,875, and the total estimated response hours is 55,688, resulting in a weighted average of 0.15 hours per respondent for executive compensation reporting.

The Councils estimate the total annual public cost burden for this element to be \$2,483,156 based on the following:

Respondents: 367,875.

Responses per respondent: 1.

Total annual responses: 367,875.

Preparation hours per response: 0.15.

Total response burden hours: 55,181.

Average hourly wages:

(\$33.06+36.25%overhead): \$45.00

Estimated cost to the public:

\$2,483,156.

Based on the above calculations, DoD, GSA, and NASA estimate the total annual burden associated with reporting requirements of FAR 52.204-10 to be \$33,323,972. The reporting burden includes the time for reviewing instructions, and reporting the data. It does not cover the time required to conduct research or the time to obtain the information for the data elements.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the Federal Acquisition Regulations (FAR), and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.
