

product-specific drift use restrictions, along with a format for presenting these statements on product labeling. The draft PR Notice also informs registrants about the procedures they should use to amend their registrations to adopt these statements. The Agency believes the use of these statements and formats on labels will provide users consistent, understandable, and enforceable directions about how to protect human health and the environment from harm that might result from pesticide drift.

Along with draft PR Notice 2009–X, EPA is issuing for comment a draft “Pesticide Drift Labeling Interpretation” guidance document, which provides guidance to state and tribal officials about how EPA intends the new drift labeling statements to be interpreted, as well as typical examples of how the labeling could be interpreted in real-world spray drift cases.

A supporting document entitled “Draft PR Notice 2009–X: Additional Information and Questions for Commenters” is also being made available in the public docket. This document contains background information on pesticide drift, and a description of current and planned EPA actions to address drift, including the PR Notice, guidance to state enforcement officials on interpreting the new labeling, information on best management practices to reduce drift, and EPA’s drift reduction technology (DRT) project. The document also provides a reader’s guide to the draft PR Notice, including a description of key terms and concepts, explanatory rationales, and specific questions on which EPA is seeking input from stakeholders.

III. Do PR Notices Contain Binding Requirements?

The draft PR Notice discussed in this notice is intended to provide guidance to EPA personnel and decision-makers and to pesticide registrants. While the requirements in the statutes and Agency regulations are binding on EPA and the applicants, the PR Notice is not binding on EPA personnel, pesticide registrants and applicants, or the public. EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide registrants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide or situation.

The draft Notice is not intended to limit EPA’s authority under FIFRA to require additional mitigation measures, on a case-by case basis, when appropriate. Nor is it intended to limit the authority of a state or tribe to impose

additional restrictions on the use of a pesticide.
