BILLING CODE 6718-04-P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-D-7534]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are requested on the proposed base (1% annual chance) flood elevations and proposed base flood

elevation modifications for the communities listed below. The base flood elevations are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The comment period is ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: The proposed base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Matthew B. Miller, P.E., Chief, Hazards Study Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-3461, or (email) matt.miller@fema.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA or Agency) proposes to make determinations of base flood elevations and modified base flood elevations for each community listed below, in accordance with Section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed base flood and modified base flood elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The

community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

National Environmental Policy Act.

This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act. The Acting Administrator, Federal Insurance and Mitigation Administration, certifies that this proposed rule is exempt from the requirements of the Regulatory Flexibility Act because proposed or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the NFIP. As a result, a regulatory flexibility analysis has not been prepared.

Regulatory Classification. This proposed rule is not a significant

regulatory action under the criteria of Section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism. This proposed rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform. This proposed rule meets the applicable standards of Section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR Part 67 is proposed to be amended as follows:

PART 67—[AMENDED]

1. The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq.; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD) •Elevation in feet (NAVD)		Communities affected
		Existing	Modified	
ILLINOIS				
St. Clair County (Unincorporated Areas)				
Silver Creek	Approximately 12,000 feet upstream of the confluence with Kaskaskia River.	*397	*396	St. Clair County (Unincorporated Areas), City of Mascoutah, City of Lebanon.
	Approximately 1.25 miles upstream of Lebanon Loyett Road.	*454	*451	
Hog River	At the confluence with Silver Creek	*422	*418	St. Clair County (Unincorporated Areas), City of Mascoutah.
Loop Creek	Just upstream of Union Street	*422	*418	St. Clair County (Unincorporated Areas).
	At the confluence with Silver Creek	*422	*418	
	Approximately 1.5 miles upstream of confluence with Silver Creek.	*422	*421	
Little Silver Creek	At the confluence with Silver Creek	*432	*429	St. Clair County (Unincorporated Areas).
	Approximately 1,500 feet upstream of confluence with Silver Creek.	*433	*432	
Ogles Creek	At the confluence with Silver Creek	*451	*449	St. Clair County (Unincorporated Areas), City of Fairview Heights.
Wolf Branch	Approximately 265 feet upstream of Old Collinsville Road.	*550	*551	St. Clair County (Unincorporated Areas), Village of Swausea.
	Approximately 1,700 feet upstream of confluence with Richland Creek.	*501	*500	
	Approximately 920 feet upstream of unnamed road.	None	*538	
Schoenberger Creek ..	Approximately at North 89th Street	None	*437	City of Belleville, City of Fairview Heights, City of East St. Louis.
Kaskaskia River	Approximately 1,500 feet upstream of State Route 161.	None	*482	Village of New Athens.
	At downstream corporate limits of Village of New Athens.	None	*395	

Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD) •Elevation in feet (NAVD)		Communities affected
		Existing	Modified	
Ponding Areas	Approximately 0.78 mile upstream of Illinois Central Railroad crossing.	None	*396	Village of New Athens.
	Between Illinois Terminal Railroad and Camp Jackson Road.	*406	*404	Village of Cahokia.
	Approximately 20 feet south of the intersection of Fox Meadow Lane and Paris Avenue.	*409	*404	Village of Cahokia.
	At intersection of Sterling Place and Bermuda Avenue.	None	*422	Village of Caseyville.
	At intersection of Countryside Drive and Acorde Drive.	*419	*422	Village of Caseyville.

BILLING CODE 6718–04–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AH00

Endangered and Threatened Wildlife and Plants; Designating Critical Habitat for *Deinandra conjugens* (Otay tarplant)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; reopening of public comment period and notice of availability of draft economic analysis.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of a draft economic analysis for the proposed designation of critical habitat for *Deinandra conjugens* (Otay tarplant). We are also providing notice of the reopening of the comment period to allow for all interested parties to submit written comments on the draft economic analysis, and the proposed designation. Comments previously received need not be resubmitted as they will be incorporated into the public record and will be fully considered in the final rule.

DATES: The original public comment period on the critical habitat proposal closed on August 13, 2001. The comment period is reopened and we will accept comments until August 9, 2002. Comments must be received by 5

p.m. on the closing date. Any comments that are received after the closing date may not be considered in the final decision on this proposal.

ADDRESSES: Written comments and information should be submitted to Field Supervisor, U.S. Fish and Wildlife Service, Carlsbad Fish and Wildlife Office, 2730 Loker Avenue West, Carlsbad, CA 92008.

FOR FURTHER INFORMATION CONTACT: Field Supervisor, Carlsbad Fish and Wildlife Office, at the above address (telephone 760–431–9440; facsimile 760–431–5902).

SUPPLEMENTARY INFORMATION:

Background

Deinandra conjugens (Otay tarplant) was known as *Hemizonia conjugens* when it was listed on October 13, 1998 (63 FR 54938). Since then, studies analyzing plant and flower morphology and genetic information prompted Baldwin (1999) to revise the Madiinae (tarplants), a tribe in the Asteraceae (sunflower family), and to reclassify several species into new or different genera. As a result, *Deinandra conjugens* is now the accepted scientific name for *Hemizonia conjugens*. This taxonomic change does not alter the limits or definition of *D. conjugens*. Because this taxonomic change was published and is generally accepted by the scientific community, we have proposed to change the name of *H. conjugens* to *D. conjugens* in 50 CFR 17.12(h) in our proposed critical habitat designation, and will use *D. conjugens* in this notice.

Deinandra conjugens was first described by David D. Keck (1958) as *Hemizonia conjugens* based on a specimen collected by L.R. Abrams in 1903 from river bottom land in the Otay Valley area of San Diego County, California. *Deinandra conjugens* is a

glandular, aromatic annual of the Sunflower Family (Asteraceae). It has a branching stem that generally ranges from 5 to 25 centimeters (2 to 10 inches) in height with deep green or gray-green leaves covered with soft, shaggy hairs. The yellow flower heads are composed of 8 to 10 ray flowers and 13 to 21 disk flowers with hairless or sparingly downy corollas (fused petals). The phyllaries (small bracts associated with the flower heads) are ridged and have short-stalked glands and large, stalkless, flat glands near the margins. *Deinandra conjugens* occurs within the range of *D. fasciculata* [= *Hemizonia fasciculata*] (fasciculated tarplant) and *D. paniculata* [= *H. paniculata*] (San Diego tarplant). *Deinandra conjugens* can be distinguished from other members of the genus by its ridged phyllaries, black anthers (part of flower that produces pollen), and by the number of disk and ray flowers.

Based on information from herbarium records at the San Diego Natural History Museum (SDNHM) and CNDDDB (2000) records, *Deinandra conjugens* has a narrow geographic distribution. The Service published a final rule on October 13, 1998, listing the species as threatened pursuant to the Endangered Species Act, as amended (Act). Additional information received after the listing indicates that the historical range for *D. conjugens* in San Diego County, California, is from the Mexican border north to Spring Valley and Paradise Valley, a distance of about 24 kilometers (km) (15 miles (mi)), and from Interstate Highway 805 east to Otay Lakes Reservoir, a distance of about 13 km (8 mi). Further, based on these museum and database records, the elevational range for *D. conjugens* appears to be between 25 and 300 meters (m) (80 and 1,000 feet (ft)).

At the time the species was listed as threatened pursuant to the Act, we
