FIFRA Pesticide Registration Review and ESA Consultation Processes; Stakeholder Input; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is announcing the availability of the final paper describing enhanced opportunities for stakeholder input during its review of pesticide registrations under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and associated consultations under the Endangered Species Act (ESA). The paper was jointly prepared by EPA, the U.S. Department of Agriculture (USDA), and the National Marine Fisheries Service (NMFS) in the U.S. Department of Commerce and the U.S. Fish and Wildlife Service (USFWS) in the Department of Interior (collectively, the Services). The paper describes significant changes to EPA's registration review process intended to facilitate ESA pesticide consultations and coordination across these Federal agencies, and calls for a greater role for USDA. EPA accepted public comment on the proposed changes for 60 days, and then reviewed the comments received. Subsequently, EPA, USDA, and the Services revised the paper to outline specific roles and responsibilities for each agency, and to provide clarifying information on focus meetings and the timing for public input.

II. Background

EPA is announcing the availability of a document titled, "Enhancing Stakeholder Input in the Pesticide Registration Review and ESA Consultation Processes and Development of Economically and Technologically Feasible Reasonable and Prudent Alternatives." A copy of this document is available in the docket at <http://www.regulations.gov> under docket ID number EPA-HQ-OPP-2012-0442. The document describes changes to EPA's pesticide registration review program and how it conducts consultation with the Services under section 7 of the ESA. In an effort to be responsive to stakeholders' desires for a mechanism to get information into the registration review process as early as possible, EPA is holding "focus" meetings at the start of registration review for each active ingredient. In response to stakeholders' desires for a more open, reliable, and transparent pesticide consultation process, EPA will initiate any needed formal ESA consultations at a later stage in the review process. Consulting later in the registration review process allows EPA to develop more refined ecological risk assessments and to engage affected stakeholders in discussions that should result in more focused consultation packages inclusive of mitigation for listed species. There is a consensus that EPA and the Services should engage informally and early in the consultation process, but that formal consultation
