The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive to read as follows:

Eurocopter France: Docket No. 2002–SW–37–AD.

Applicability: Eurocopter France Model AS350B, B1, B2, BA, and D helicopters, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required before flight, unless accomplished previously.

To prevent a fire from spreading from the engine compartment through the firewall to the main gearbox due to a non-fireproof engine oil tank breather pipe (breather pipe), additional structural damage, and a decrease in the time available to execute an emergency landing, accomplish the following:

(a) Modify the engine oil tank breather pipe to make it fireproof by installing a high-temperature silicone glass protective sheath, part number ASNO199–024, in accordance with the Accomplishment Instructions, paragraph 2.A., in Eurocopter AS 350 Service Bulletin No. 79.00.11, Revision No. 1, dated May 5, 2000.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Regulations Group, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Regulations Group.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Regulations Group.

(c) Special flight permits may be issued in accordance with 14 CFR 21.197 and 21.199 to operate the helicopter to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in Direction Generale De L'Aviation Civile (France) AD 2000–268–078(A), dated June 28, 2000.

Issued in Fort Worth, Texas, on October 24, 2002.

David A. Downey,

Manager, Rotorcraft Directorate, Aircraft Certification Service.
