

Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** Section 8(a) of the Toxic Substances Control Act (TSCA) authorizes EPA to promulgate rules under which manufacturers, importers and processors of chemical substances and mixtures must maintain records and submit reports to EPA. EPA has promulgated the Preliminary Assessment Information Rule (PAIR) under TSCA section 8(a). EPA uses PAIR to collect information to identify, assess and manage human health and environmental risks from chemical substances, mixtures and categories. PAIR requires chemical manufacturers and importers to complete a standardized reporting form to help evaluate the potential for adverse human health and environmental effects caused by the manufacture or importation of identified chemical substances, mixtures or categories. Chemicals identified by EPA or any other federal agency, for which a justifiable information need for production, use or exposure-related data can be satisfied by the use of the PAIR are proper subjects for TSCA section 8(a) PAIR rulemaking. In most instances the information that EPA receives from a PAIR report is sufficient to satisfy the information need in question. This information collection addresses the reporting and recordkeeping requirements associated with TSCA section 8(a).

**Respondents/Affected entities:** Entities potentially affected by this ICR are companies that manufacture, process or import chemical substances, mixtures or categories.

**Respondent's obligation to respond:** Mandatory (see 40 CFR parts 712, 766, and 792).

**Estimated total number of potential respondents:** 1.

**Frequency of response:** On occasion.

**Estimated total burden:** 31.5 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Estimated total costs:** \$ 2,388 (per year), includes no annualized capital investment or maintenance and operational costs.

**Changes in the estimates:** There is a decrease of 916 hours in the total

estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's reduced estimate of the assumed number of PAIR reports submitted annually, and also reflects burden changes resulting from mandatory electronic submissions of PAIR reports. This change is both an adjustment and the result of a program change.

**Authority:** 44 U.S.C. 3501 *et seq.*

### Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Petroleum Refineries (Renewal)

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** The Environmental Protection Agency has submitted an information collection request (ICR), "NESHAP for Petroleum Refineries (40 CFR part 63, subpart CC) (Renewal)" (EPA ICR No. 1692.09, OMB Control No. 2060-0340), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through March 31, 2016. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

**DATES:** Additional comments may be submitted on or before April 20, 2016.

**ADDRESSES:** Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2011-0234, to: (1) EPA online using [www.regulations.gov](http://www.regulations.gov) (our preferred method), or by email to [docket.oeca@epa.gov](mailto:docket.oeca@epa.gov), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T,

**Abstract:** Owners and operators of petroleum refineries are required to comply with reporting and record-keeping requirements for the general provisions of 40 CFR part 63, subpart A, as well as for the applicable standards found in 40 CFR part 63, subpart CC. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

**Form Numbers:** None.

**Respondents/affected entities:** Existing and new petroleum refining process units and emission points located at refineries that are major sources of hazardous air pollutants (HAP) emissions.

**Respondent's obligation to respond:** Mandatory (40 CFR part 63, subpart CC).

**Estimated number of respondents:** 142 (total).

**Frequency of response:** Initially, occasionally, annually and semiannually.

*Total estimated burden:* 528,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$54,800,000 (per year), which includes \$143,000 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is a decrease in respondent labor hours and the total O&M costs from the most-recently approved ICR. The decrease in burden is due to adjusting the number of respondents from 148 to 142. The updated number of respondents is based on the Agency's industry analysis conducted for the recent RTR rule amendment, documented in EPA ICR Number 1692.08. This estimate is based on information from EPA's Petroleum Refinery Database (contains data provided by each individual refinery in response to an EPA survey of the petroleum refinery industry in 2011) and the Agency's internal data sources. However, there is a small adjustment increase in the number of responses due to a correction. The previous ICR did not account for semiannual heat exchanger system reports in calculating the number of responses. This ICR renewal includes this item to be consistent with the Table 1 and Table 2 burden calculations.

**Abstract:** Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR part 60, subpart A, as well as

for the specific requirements at 40 CFR part 60, subpart Cb. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

*Form Numbers:* None.

*Respondents/affected entities:* Large municipal waste combustors.

*Respondent's obligation to respond:* Mandatory (40 CFR part 60, subpart Cb).

*Estimated number of respondents:* 81 (total).

*Frequency of response:* Initially, occasionally, semiannually and annually.

*Total estimated burden:* 397,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$59,400,000 (per year), which includes \$1,560,000 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is a small adjustment increase in the respondent labor hours and costs and the total O&M costs as currently identified in the OMB Inventory of Approved Burdens. The increase in labor hours and cost is due to a change in assumption. In this ICR, we assume all existing sources will take some time each year to re-familiarize themselves with the regulatory requirements. The increase in total O&M cost is due to rounding of all calculated values to three significant figures.
