

an Environmental Assessment (EA) in support of this amendment in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

II. EA Summary

The purpose of the proposed amendment is to authorize the remediation of soil and ground water contaminated with diesel range organics (DRO), radium-226, and minute amounts of volatile organic compounds at the licensee's Sweetwater Uranium Project. Specifically, the amendment will allow the licensee to excavate contaminated soils and extract contaminated ground water from the catchment basin area and dispose of these contaminated materials (11e.(2) byproduct material) within the existing tailings impoundment.

On May 12, 2004, Kennecott Uranium Company requested that NRC approve the proposed amendment. The staff has prepared the EA in support of the proposed license amendment. Staff considered impacts to land use, geology and soils, water resources, ecology, meteorology, climatology, air quality, socioeconomic, historical and cultural resources, public and occupational health, and transportation. The staff found that the impacts of the proposed action were not significant because these actions would remove contamination sources and residual contamination, and they will occur within a small portion of the NRC-licensed area that was previously used as part of the milling process. Consequently, these actions will prevent the spread of contamination to environmental resources without causing significant impacts to historical and cultural resources, local economy and social resources, and transportation networks.

III. Finding of No Significant Impact

On the basis of the EA, NRC has concluded that there are no significant environmental impacts from the proposed amendment and has determined not to prepare an environmental impact statement.

USEC, Inc.

(American Centrifuge Plant)

A Licensing Board is being established pursuant to a May 12, 2005 Commission memorandum and order (CLI-05-11, 60 NRC __) in this proceeding regarding the application of the USEC, Inc., (USEC) for a license to possess and use source, byproduct, and special nuclear material and to enrich natural uranium to a maximum of ten percent U-235 by the gas centrifuge

process at a facility, to be known as the American Centrifuge Plant, that would be located in Piketon, Ohio. At the outset of this proceeding, the Commission indicated it would make threshold standing determinations itself, and would refer the petitions of persons with the requisite standing to the Atomic Safety and Licensing Board Panel for further adjudicatory proceedings (CLI-04-30, 60 NRC 426, 429 (2004); *see also* 69 FR 61411 (Oct. 18, 2004)). In its May 12 issuance, the Commission found that both organizational petitioner Portsmouth/Piketon Residents for Environmental Safety and Security (PRESS) and individual petitioner Geoffrey Sea have standing to intervene and, accordingly, referred their petitions and associated contentions to the Panel for further appropriate action.

The Board is comprised of the following administrative judges:
Lawrence G. McDade, Chair, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Issued at Rockville, Maryland, this 17th day of May, 2005.
