### Abstract of Proposed Collection

The U.S. State Department is required to collect periodic program performance reports. As a part of these reporting requirements, ECA requires implementing partners to provide performance monitoring data in the form of a post-program survey. The Qualtrics survey platform will be utilized by ECA and implementing partners to standardize post-program survey data collection, aggregation, and reporting both internally and externally. The Qualtrics platform will consolidate data from all ECA programs onto a single survey platform, streamlining the survey creation process, ensuring the reliability of data, and automatically aggregating and visualizing program performance data.

### Methodology

ECA will be responsible for providing the username and login information for each implementing partner who will use the Qualtrics platform for the post-program surveys required to meet the performance monitoring reporting requirements outlined in the award. ECA will also be responsible for providing the suite of survey questions within Qualtrics to ease the burden of setup for the implementing partners. The implementing partners will be responsible for selecting the required survey questions, inserting any custom survey questions they would like to ask, creating the mailing list of respondents, and launching the survey.
