#### E.R. Jacobson; Notice of Availability of Final Environmental Assessment

October 4, 2001.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects staff has reviewed the application for an amendment of license for the Jacobson Hydro No. 1 Project (FERC No. 4515-010 and -014). A final environmental assessment (FEA) is available for public review. The FEA was attached to an Order Amending License and Lifting Stay (96 FERC ¶ 61,298) issued and distributed by the Commission on September 13, 2001. The project is located on the Colorado River near the town of Palisade, Mesa County, Colorado. The FEA finds that approval of the application would not constitute a major federal action significantly affecting the quality of the human environment.

The FEA was written by staff in the Office of Energy Projects, Federal Energy Regulatory Commission. Copies of the FEA are available for review in the Commission's Public Reference Branch, Room 2A, 888 First Street, NE., Washington, DC 20426 or by calling (202) 208-1371. Copies of this filing are on file with the Commission and are available for public inspection. [Docket Nos. CP98-150-000, et al. and CP98-151-000]

#### Millennium Pipeline Company, L.P., Columbia Gas Transmission Corp.; Notice of Availability of the Final Environmental Impact Statement for The Proposed Millennium Pipeline Project

October 4, 2001.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a Final Environmental Impact Statement (FEIS) on the natural gas pipeline facilities proposed by Millennium Pipeline Company (Millennium) and Columbia Gas Transmission Corporation (Columbia) in the above-referenced dockets.

The FEIS was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project with the appropriate mitigating measures as recommended, would have limited adverse environmental impact. The FEIS also evaluates alternatives to the proposal, including an alternative called the ConEd Offset/Taconic Parkway Alternative that is preferred; major route alternatives, including system alternatives; and route variations.

The FEIS addresses the potential environmental effects of:

1. Construction and operation of these facilities in New York:

- 373.5 miles of 36-inch-diameter pipeline;
- 43.8 miles of 24-inch-diameter pipeline;
- 3 measurement and regulating stations and 1 regulator station; and
- associated pipeline facilities, including pipeline and block valves, pig launchers and receivers, blowdown valves, and cathodic protection rectifier beds.

2. Acquisition from Columbia of:

- 6.7 miles of 24-inch-diameter pipeline in Rockland County, New York, that would be used for the new pipeline system between mileposts 376.4 and 383.3; and
