

through new experiments, samples or tests.

(d) Making the data and models publicly available will assist in determining whether analytical results are capable of being substantially reproduced.

(3) These guidelines do not alter the otherwise applicable standards and procedures for determining when and how information is disclosed. Thus, the objectivity standard does not override other compelling interests, such as privacy, trade secret, and other confidentiality protections.

d. "Integrity" refers to the security of information—protection of the information from unauthorized access or revision, to ensure that the information is not compromised through corruption or falsification.

e. "Information" means any communication or representation of knowledge such as facts or data, in any medium or form, including textual, numerical, graphic, cartographic, narrative, or audiovisual forms. This definition includes information that the Endowment disseminates from a web page, but does not include the provision of hyperlinks to information that others disseminate. This definition does not include opinions, where the Endowment's presentation makes it clear that what is being offered is an individual's opinion rather than fact or the Endowment's views.

f. "Government information" means information created, collected, processed, disseminated, or disposed of by or for the Federal Government.

g. "Information dissemination product" means any book, paper, map, machine-readable material, audiovisual production, or other documentary material, regardless of physical form or characteristic, an Endowment disseminates to the public. This definition includes any electronic document, CD-ROM, or web page.

h. "Dissemination" means Endowment initiated or sponsored distribution of information to the public in all media and formats. Dissemination does not include:

(1) distribution limited to government employees or Endowment contractors or grantees; intra-or inter-agency use or sharing of government information;

(2) responses to requests for Endowment records under the Freedom of Information Act, the Privacy Act, the Federal Advisory Committee Act or other similar law; or

(3) distribution limited to correspondence with individuals or persons, press releases, archival records, public filings, subpoenas or adjudicative processes.

i. "Influential" when used in the phrase "influential statistical information" means the Endowment expects that information in the form of analytical results will likely have an important effect on the development of domestic or international government or private sector policies or will likely have important consequences for specific technologies, substances, products, or firms.

j. "Capable of being substantially reproduced" means that independent reanalysis of the original or supporting data using the same methods would generate similar analytical results, subject to an acceptable degree of imprecision.
