

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the SAB Panel for the Review of EPA's 2007 Report on the Environment will hold a public teleconference and public meeting to conduct a peer review of EPA's draft Report on the Environment 2007: Science Report. The SAB was established by 42 U.S.C. 4365 to provide independent scientific and technical advice to the Administrator on the technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C., App. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

Background: In 2003, EPA issued a draft Report on the Environment describing the status of and trends in the environment and human health. The draft 2003 Report on the Environment was reviewed by the SAB (see http://www.epa.gov/sab/pdf/sab_05_004.pdf). EPA used advice received from the SAB and comments from stakeholders to develop an improved and updated draft Report on the Environment 2007. The Report on the Environment 2007 consists of a Science Report (ROE 2007 Science Report) containing detailed scientific and technical information, a Highlights Document written for concerned citizens, and an electronic document facilitating access to material in the reports.

EPA's Office of Research and Development has requested that the SAB review the ROE 2007 Science Report. The ROE 2007 Science Report asks key questions about the current status of, and trends in, the condition of the environment and human health. These questions are intended to be relevant to EPA's current regulatory and programmatic activities and mission, and they have been answered using a suite of environmental and human health indicators. The SAB has been asked to comment on: (1) The adequacy of the formulation and scope of the questions addressed in the ROE 2007 Science Report, (2) the appropriateness of the indicators used to answer the questions in the report, (3) the accuracy of the characterization of gaps and limitations in the indicators used in the report, (4) the appropriateness of regionalization of national indicators in the report, (5) the utility of regional indicators in the report, and (6) the overall quality of the report with respect to technical accuracy, clarity, and appropriateness of level of communication.

In response to EPA's request, the SAB Staff Office formed the SAB Panel for the Review of EPA's 2007 Report on the Environment. Background on the Panel formation process was provided in a **Federal Register** notice published on May 25, 2006 (71 FR 30138-30139). Information about the SAB Panel for the Review of EPA's 2007 Report on the Environment is available on the SAB Web site at: <http://www.epa.gov/sab>.

Agendas and other material for the upcoming public teleconference and meeting will be posted on the SAB Web site <http://www.epa.gov/sab>.
