Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application is not ready for environmental analysis at this time.

l. *The proposed Nash Mill Project consists of the following existing facilities:* (1) a 57-foot-long, 9-foot-high, concrete gravity dam topped with 3-foot-high collapsible wooden flashboards with a crest elevation of 1,133.41 feet North American Vertical Datum 1988 (NAVD 88) at the top of the flashboards; (2) a 2-acre impoundment; (3) an intake structure on the north side of the dam equipped with a 10-foot-high by 10-foot-wide trash rack with 1-inch clear bar spacing; (4) a 4-foot-diameter, 1,525-foot-long, round steel penstock that trifurcates into two 2-foot-diameter penstocks and one 4-foot-diameter pipe; (5) a 31-foot-long by 18-foot-wide powerhouse that contains two vertical-shaft, fixed propeller turbine-generator units and one horizontal-shaft turbine-generator unit for a total installed capacity of 225 kilowatts; (6) a 600-foot-long tailrace; (7) a 1,800-foot-long bypassed reach; (8) a 0.48 kilovolt (kV), 75 kilo-volt-ampere transformer; (9) a 1,830-foot-long, 12.5-kV transmission line; and (10) appurtenant facilities.

Marlow Hydro currently operates the project in a run-of-river mode. The current license requires Marlow Hydro to release a continuous minimum flow of 23 cubic feet per second (cfs) from the project as measured downstream of the powerhouse, with a continuous flow of 5.2 cfs over the dam. From 2016 to 2020, average annual generation of the Nash Mill Project was 552 megawatt-hours.

Marlow Hydro proposes to continue operating the project in a run-of-river mode and would increase the bypass flow from 5.2 cfs to 14.5 cfs.

o. *Scoping Process*: Pursuant to the National Environmental Policy Act (NEPA), Commission staff intends to prepare either an environmental assessment (EA) or an environmental impact statement (EIS) (collectively referred to as the "NEPA document") that describes and evaluates the probable effects, including an assessment of the site-specific and cumulative effects, if any, of the proposed action and alternatives. The Commission's scoping process will help determine the required level of analysis and satisfy the NEPA scoping requirements, irrespective of whether the Commission issues an EA or an EIS.

At this time, we do not anticipate holding an on-site scoping meeting. Instead, we are soliciting written comments and suggestions on the preliminary list of issues and alternatives to be addressed in the NEPA document, as described in scoping document 1 (SD1), issued March 18, 2025. Copies of the SD1 outlining the subject areas to be addressed in the NEPA document were distributed to the parties on the Commission's mailing list and the applicant's distribution list.
