

and technology. The NASA Office of Education administers the agency's national education activities in support of the Space Act, including the performance measurement and evaluation of educational projects and programs. This generic clearance will allow the Office of Education to test and pilot with subject matter experts, higher education students, educators, and interested parties new and existing information collection forms and assessment instruments for the purposes of improvement and establishing validity and reliability characteristics of the forms and instruments. Forms and instruments to be tested include program application forms, customer satisfaction questionnaires, focus group and cognitive interview protocols, and project activity survey instruments. Methodological testing will include focus group discussions, pilot surveys to test new individual question items as well as the complete form and instrument. In addition, split-half methodology and similar protocols will be used to determine reliability characteristics of the forms and instruments. Methodological testing will assure that forms and instruments accurately and consistently collect and measure what they are intended to measure and that data collection items are interpreted precisely and consistently, all towards the goal of accurate Agency reporting while improving the execution of NASA Education project activities.

This 30-day FRN reflects a reduction in the estimated number of respondents, as published in the 60-day FRN, Volume 78, Number 237, pages 74169–74170 on Tuesday, December 10, 2013. The targeted respondent pool will include educators, pre-college, undergraduate, graduate, and post-graduate students only. As a result of this reduction, the estimated cost burden also decreased. The cost burden reflects the estimated amount of time it will take for respondents to read the instructions, gather and submit the information. This 30-day notice also replaces FRN Notice 14–121, Volume 79, Number 225, pages 69537–69538 published on Friday, November 21, 2014 which incorrectly identified secondary students as part of the respondent pool.
