SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to request an extension of the Quarterly Survey of State and Local Tax Revenue. The Census Bureau needs state and local tax data to publish benchmark statistics on public sector taxes, to provide data to the Bureau of Economic Analysis for GDP calculations and other economic indicators, and to provide data for economic research and comparative studies of governmental finances. Data are collected on a quarterly basis from state and local government tax collecting agencies.

Tax collection data are used to measure economic activity for the Nation as a whole, as well as for comparison among the various states. These data also are useful in comparing the mix of taxes employed by individual states, and in determining the revenue raising capacity of different types of taxes.

The survey collects data using three forms:

The Quarterly Survey of Property Tax Collections (Form F-71) is sent to 5,379 local government tax collecting agencies in 592 county areas. While some counties are served by a single county-level tax collection agency, others have county, city, township, and even school district collectors. Each agency is asked to report the total property tax collections during the past quarter. In addition to the current sample, Census is implementing a new sample which will increase the overall collection size to 6,946 local government tax collecting agencies in 609 county areas (with 4,002 local governments overlapping on both samples). This sample revision will ensure that this portion of the survey meets OMB's statistical standards. We will continue to collect the concurrent samples for four quarters at which time
