The purpose of the overall study is to determine the effectiveness of the academy prevention programming in addressing sexual harassment and sexual assault. The survey assesses topics such as rape myth acceptance, descriptive behavioral norms at the respective academies, experiences of sexual harassment and sexual assault, alcohol-related sex expectancies, witnessing experiences that might call for bystander intervention to prevent sexual harassment and/or sexual assault, and personal responses when exposed to these situations. The surveys are voluntary. Data are aggregated by appropriate sociodemographic categories (sex, sexual orientation, race/ethnicity, and varsity athletic participation; sociodemographic responses will be recoded as binary indicators to prevent anyone from figuring out an individual participant's identity based on unique characteristics).
