information collection, as required by
the Paperwork Reduction Act of 1995.
This notice invites comment on a
proposed information collection project
titled National Disease Surveillance
Program—II. Disease Summaries

is used to determine the prevalence of
disease and for planning and evaluating
programs for prevention and control of
infectious diseases.

SUPPLEMENTARY INFORMATION: Under the
Paperwork Reduction Act of 1995 (PRA)
(44 U.S.C. 3501-3520), Federal agencies
must obtain approval from the Office of
Management and Budget (OMB) for each
collection of information they conduct
or sponsor. In addition, the PRA also
requires Federal agencies to provide a
60-day notice in the **Federal Register**
concerning each proposed collection of
information, including each new
proposed collection, each proposed
extension of existing collection of
information, and each reinstatement of
previously approved information
collection before submitting the
collection to the OMB for approval. To
comply with this requirement, we are
publishing this notice of a proposed
data collection as described below.

The OMB is particularly interested in
comments that will help:

1. Evaluate whether the proposed
collection of information is necessary
for the proper performance of the
functions of the agency, including
whether the information will have
practical utility;

2. Evaluate the accuracy of the
agency's estimate of the burden of the
proposed collection of information,
including the validity of the
methodology and assumptions used;

3. Enhance the quality, utility, and
clarity of the information to be
collected; and

4. Minimize the burden of the
collection of information on those who
are to respond, including through the
use of appropriate automated,
electronic, mechanical, or other
technological collection techniques or
other forms of information technology,
e.g., permitting electronic submissions
of responses.

5. Assess information collection costs.

Proposed Project

National Disease Surveillance
Program II Disease Summaries (OMB
Control Number 0920-0004, Expiration
Date 10/31/2020) — Revision —
National Center for Immunization and
Respiratory Diseases (NCIRD), Centers
for Disease Control and Prevention
(CDC).

Background and Brief Description

CDC requests a three-year approval for
the revision of the National Disease
Surveillance Program II Disease
Summaries information collection. As
with the previous approval, these data
are essential for measuring trends in
diseases, evaluating the effectiveness of
current preventive strategies, and
determining the need to modify current
preventive measures. The following
diseases in this surveillance program are
Influenza Virus, Caliciviruses,
Respiratory and Enteric Viruses.
Proposed revisions include removal of
the National Outbreak Reporting System
(NORS) from this information collection
request (NORS is now being submitted
as its own information collection
request, separate from 0920-0004), and
addition of bocavirus and norovirus to
two worksheets (CDC 55.83A and CDC
55.83D). The data will enable rapid
detection and characterization of
outbreaks of known pathogens, as well
as potential newly emerging viral
pathogens.

The total burden estimate for all
collection instruments in this revision
request is 24,115. The frequency of
response for each form will depend on
the disease and surveillance need. This
reduction in burden hours is primarily
attributed to the removal of NORS from
this information collection.
