Background

Pursuant to, among other authorities, 7 U.S.C. 2020(a)(3) and (e)(8)(A) and 7 CFR 272.1(c)(1) and (e), FNS will work with all State agencies and their designated vendors and/or contractors to transmit data on SNAP participants and transactions for the purposes listed below. USDA and FNS will use the SNAP data in this system to ensure the integrity of Government programs, including by verifying SNAP recipient eligibility against federally maintained databases, identifying and eliminating duplicate enrollments, and performing additional eligibility and program integrity checks specified herein.

The system of records notice explains how the records within the new system will be used and with whom they will be shared.

Privacy Act

The Privacy Act of 1974 (the Privacy Act), 5 U.S.C. 552a, embodies fair

information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates records about individuals. The Privacy Act applies to information that is maintained in a SOR. A SOR is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each SOR that the agency maintains, to publish the routine uses that are contained in each system in order to make agency record keeping practices transparent, and to notify individuals regarding the uses and locations of their records.

In accordance with 5 U.S.C. 552a(r), USDA has provided a report of this SOR to the Office of Management and Budget and to the relevant committees of Congress.
