II. Discussion

On May 4, 2021, the NRC published a document in the **Federal Register** (86 FR 23750) requesting comments on DG–1381, "Control of Heavy Loads at Nuclear Facilities." This DG is a proposed new regulatory guide to endorse selected national consensus standards related to heavy load handling that replace NRC technical reports. The national consensus standards provide greater flexibility in the selection of lifting equipment and have incorporated recent operating experience to provide a more accurate risk-informed perspective of heavy load handling activities. This is a new regulatory guide incorporating guidance for risk-informing heavy load handling activities. The public comment period was originally scheduled to close on June 3, 2021. Upon the request of industry, specifically Nuclear Energy Institute, the NRC has decided to extend the public comment period on this document until July 5, 2021, to allow more time for members of the public to submit their comments.
