

27, 2003). A complete explanation of the selection, corroboration, and application of adverse facts available can be found in the preliminary determination. See *Preliminary Determination*, 68 FR at 71070–71. Nothing has changed since the preliminary determination was issued that would affect the Department's selection and application of facts available. No interested parties commented on any aspect of our application of adverse facts available. Accordingly, for the final determination, we continue to use the highest margin stated in the notice of initiation for Armor. The "All Others" rate remains unchanged as well.

Analysis of Comments Received

We received no comments from interested parties in response to our preliminary determination in this investigation, except for the comments on the country-of-origin issue, which are fully addressed above. We received no case briefs or rebuttal briefs. We did not hold a hearing because none was requested.

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we are directing CBP to continue to suspend liquidation of all entries of TTR exported from France that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of the preliminary determination. CBP shall continue to require a cash deposit or the posting of a bond based on the estimated dumping margins shown below. The suspension of liquidation instructions will remain in effect until further notice. We determine that the following dumping margins exist:

Manufacturer/exporter	Margin (percent)
Armor S.A.	60.60
All Others	44.93

International Trade Commission Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. The ITC will determine, within 45 days, whether imports of subject merchandise from France are materially injuring, or threatening material injury to, an industry in the United States. If the ITC determines that material injury or threat of injury does not exist, this proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, the Department will issue an

antidumping duty order directing CBP officials to assess antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse for consumption on or after the effective date of the suspension of liquidation.

This notice also serves as a reminder to parties subject to APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This determination is issued and published in accordance with sections 735(d) and 777(i)(1) of the Act.

Dated: March 1, 2004.

Title: Method For Producing Metal Particles by Spray Pyrolysis Using a Co-solvent and Apparatus Therefore.

Abstract: Gas-to-particle conversion processes have been used to produce various micro and nanoscale metal powders because of their convenient process characteristics. Recently, hydrogen gas approaches for reducing metal oxides made from metal precursor aerosols in gas-to-particle conversion processes were developed by several research groups. However, aerosol decomposition reactions may be very dangerous at high temperatures due to the explosive potential of hydrogen at high concentrations in the presence of oxygen. This invention is a novel process based on the use of a co-solvent for preparing pure metal nanoparticles under safe conditions in a high-temperature aerosol decomposition reactor. The resulting copper nanoparticles prepared from copper nitrate using a nitrogen carrier gas at 600° C with a 3.3 second resident time are pure. X-ray diffraction is used for measuring particle composition and a transmission electron microscope (TEM) is used for imaging to determine particle morphology.
