

implicit price deflator for gross national products with 1991 as the base year). BLM proposes that the effective date of the end of the suspension be the first day of the month more than 6 months after publication of the notice of re-initiation in the **Federal Register**.

In order to receive the benefits under the heavy oil royalty reduction program after the suspension ends, operators/payers must follow the regulations at 43 CFR 3103.4–3, including the requirement to notify BLM under § 3103.4–3(b).

BLM recognizes that the \$24 per barrel trigger was instituted over 8 years ago and conditions since that time may have changed considerably. Therefore, BLM is requesting comments on the conditions under which a suspension should end. Specifically, BLM seeks comment on whether it should re-initiate relief sooner than 6 months after it publishes notice that the program is beginning again after 6 months of below-trigger prices. Please see the **ADDRESSES** section above for information on where to submit your comments.
