n. The Mill Pond Project consists of the following existing facilities: (1) a concrete gravity dam approximately 3 to 5 feet high and 130 feet long with a crest elevation of 105 feet mean sea level (msl) topped by 3-foot-high pneumatic flashboards for a spillway crest of 108 feet msl; (2) a 20-foot natural ledge rock fall; (3) a 7.28-acre reservoir with a gross storage capacity of 82 acre-feet at normal water surface elevation of 108 feet msl; (4) an intake structure that includes a trash rack with 1.75-inch clear bar spacing; (5) a 36-inch-diameter concrete trough and conveyance chute adjacent to the intake that passes minimum flows, fish, ice, and debris downstream; (6) an approximately 10-foot-diameter, 147-foot-long steel penstock that bifurcates into two separate, equivalent diameter sections; (7) a powerhouse 30 feet wide and 32 feet long containing two generating units rated at 500 kilowatts (kW) each for a total installed capacity of 1,000 kW; (8) 2.4-kilovolt (kV) generator leads connecting the generating units to a 13.2-kV-ampere step-up transformer located in a small switchyard; (9) a 200-foot-long (mostly underground) transmission line from the step-up transformer to the point of interconnection with the distribution system; and (10) appurtenant facilities.

Rivers Electric proposes to continue operating the project in a run-of-river mode such that outflow from the project approximates inflow to the project reservoir and to release, through the conveyance chute, a minimum flow of 20 cubic feet per second, or inflow,

[Docket No. CP25–79–000]

**ANR Pipeline Company; Notice of Schedule for the Preparation of an Environmental Assessment for the Heartland Project**

On February 20, 2025, ANR Pipeline Company (ANR) filed an application in Docket No. CP25–79–000 requesting a Certificate of Public Convenience and Necessity pursuant to Section 7(c) and Authorization pursuant to Section 7(b) of the Natural Gas Act to construct, replace, and operate certain natural gas pipeline facilities. The proposed project is known as the Heartland Project (Project) and would expand ANR’s existing system to provide up to 473,000 dekatherms per day of incremental firm transportation service to meet market demand for increased natural gas supply in the Midwest United States.

On March 6, 2025, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff’s environmental document for the Project.
