

B. Estimated Burden

The Commission staff estimates that about 40 firms are subject to the testing and recordkeeping requirements of the regulations. Each one may have an average of ten products each year for which testing and recordkeeping would be required. The Commission staff estimates that the tests required by the regulations can be performed on one product in 16 hours and that recordkeeping and maintenance can be performed for one product in four hours. Thus, the total annual burden imposed by the regulations on all manufacturers and importers is about 8,000 hours. Using the rate of \$42.30 per hour as the average total compensation (Total Compensation, Private Goods-Producing Section, Managerial, Executive, and Administrative Category, Bureau of Labor Statistics), the estimated annualized cost is \$338,400.

C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.

Title and OMB Number: Exposure and Medical Surveillance Program for the Pentagon in the Aftermath of 9-11-01; OMB Number 0704-[To be determined].

Needs and Uses: The information collection requirement is necessary to obtain and record the temporal and spatial location of those present at the Pentagon on 9-11-01 and in the three month time period that followed, and to

obtain and record known or perceived exposures or symptoms of same population. The recorded information will be used to estimate possible exposure to hazardous contaminants, and to individually recommend appropriate medical follow-up.

Affected Public: Individuals, State and local governments and other responders to crash scene, visitors, construction and clean-up contractors.

Annual Burden Hours: 950 hours.

Number of Respondents: 1900.

Responses per Respondent: 1.

Average Burden per Response: 30 minutes.

Frequency: One time.

SUPPLEMENTARY INFORMATION:

Summary of Information Collection

The terrorist activity at the Pentagon on September 11, 2001, resulted in the destruction of a large amount of building materials and equipment in a devastating manner. The catastrophe has raised concerns of possible health effects, ranging from acute and temporary to longer-term and permanent, resulting from exposures to hazardous materials and air contaminants of the building occupants and first responders on September 11th, and, for some contaminants, continuing since that date. This program will enumerate potentially affected individuals, estimate their exposures on and since September 11, 2001, and based on these exposure estimates, make recommendations on an individual basis for their appropriate medical follow-up. Collecting symptomatic and location information from individuals at and near the crash site is essential in executing a thorough and accurate medical surveillance program.
