EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The authority for EPA's facility response plan (FRP) requirements is derived from section 311(j)(5) of the Clean Water Act, as amended by the Oil Pollution Act of 1990. EPA's regulation is codified at 40 CFR 112.20 and 112.21 and related appendices. The owner or operator of a facility subject to 40 CFR 112.20 must prepare and submit an FRP to EPA based on the following applicability criteria: (1) The facility transfers oil over water to or from a vessel and has a total

storage capacity of greater than or equal to 42,000 gallons; or (2) the facility's total oil storage capacity is greater than or equal to one million gallons and one or more of the following harm factors are met: Insufficient secondary containment for aboveground storage tanks at the facility; a discharge of oil could cause injury to fish and wildlife and sensitive environments; a discharge of oil could shut down a drinking water intake; the facility has experienced a reportable oil discharge of 10,000 gallons or more in the last 5 years; or other factors considered by the Regional Administrator (see 40 CFR 112.20(a)(2), (b)(1), (f)(1) and (f)(2) for further information).

The purpose of an FRP is to help an owner or operator identify the necessary resources to respond to an oil discharge in a timely manner. If implemented effectively, the FRP will reduce the impact and severity of oil discharges and may prevent discharges because of the identification of risks at the facility. Although the owner or operator is the primary data user, EPA also uses the data in certain situations to ensure that facilities comply with the regulation and to help allocate response resources. State and local governments may use the data, which are not generally available elsewhere, and can greatly assist local emergency preparedness planning efforts. The EPA reviews all submitted FRPs and must approve FRPs for those facilities whose discharges may cause significant and substantial harm to the environment to ensure that facilities believed to pose the highest risk have planned for adequate resources and procedures to respond to oil discharges (See 40 CFR 112.20(f)(3) for further information about the criteria for significant and substantial harm.). No information collected under the FRP rule is expected to be confidential. One of the criteria necessary for information to be classified as "proprietary business information" (40 CFR 2.208) is that a business must show that it has previously taken reasonable measures to protect the confidentiality of the information and that it intends to continue to take such measures. EPA provides no assurances of confidentiality to facility owners or operators when they file their FRPs.

The burden estimates, numbers and types of respondents, wage rates and unit and total costs for this ICR renewal will be revised and updated, if needed, during the 60-day comment period while the ICR Supporting Statement is undergoing review at OMB.

Form Numbers: None.

Respondents/affected entities: Owners or operators of facilities

required to have Spill Prevention, Control, and Countermeasure (SPCC) plans under the Oil Pollution Prevention regulation (40 CFR part 112) and that, because of their location, could reasonably be expected to cause substantial harm to the environment.

Respondent's obligation to respond: Mandatory under section 311(j)(5) of the Clean Water Act, as amended by the Oil Pollution Act of 1990.

Estimated number of respondents: 16,027 (total).

Frequency of response: Annual.

Total estimated burden: 385,784 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$17,728,836 (per year), includes \$3,355 annualized capital or operation and maintenance costs.

Changes in Estimates: Total estimated costs reflect U.S. Bureau of Labor Statistics labor rates as of May 2020. This estimate is based on EPA's current inventory of facilities that have submitted and are maintaining an FRP. Any change in burden or cost resulting from the 60-day OMB review period will be described and explained in this section when the updated ICR Supporting Statement is completed.

Dated: October 28, 2021.

Donna Salyer,

Director, Office of Emergency Management.
